Ev Charger Update Customer Service:

Entrepreneurship, Innovation and Consultancy Wael Saghir, 2025-11-20 This book explores the journey of entrepreneurship from idea to reality and outlines the different stages associated with starting an innovative business. As well as being a step by step guide to where an idea comes from and how it can be transformed into a business, the book also reviews the practical tools that can be used to harness creativity in entrepreneurial settings. The book is designed to develop general awareness of the entrepreneurial mindset and business start up skills. Taking the reader on a journey from how an idea is conceived, developed and turned into a business, the book shows how to build enterprises and how to find creative and innovative solutions for challenging problems. It aims to introduce readers to the key issues and ideas involved in business start ups and help them understand the various challenges facing the entrepreneur as well as how to find and implement creative solutions to these challenges. An essential read for current and aspiring entrepreneurs, business start ups and students and lecturers on courses in entrepreneurship, business start up and consultancy. **Entrepreneurship, Innovation and Consultancy** is a vital and practical guide for anyone engaged in starting a new business and who wants to discover more about transforming their business idea into a reality. [Climate Change and Clean Energy Management](#) Henry

Wang, 2019-10-22 Climate change has never been more important than it is now as it has become arguably the world's most urgent problem. Solving this problem is proving difficult and complex as it involves joint efforts by governments, companies, communities and innovators. The increased use of fossil fuels associated with global economic growths has led to rising GHG emissions and global warming. There are many challenges for countries that are enacting new climate and clean energy regulations in line with their Paris Agreement commitments. Good government policies and corporate strategies are essential to support these efforts as part of the global climate change crisis. This important book addresses the latest climate change impacts and developments in potential mitigation strategies. These include fossil to clean energy transition, smart low carbon city designs, green transportation, electric vehicles, green agriculture, carbon emission trading, carbon capture solutions, plus climate finance and risk management. Potential new policies and strategies to support the successful implementation of these important strategic areas are discussed together with high level country and business case examples. This book is essential reading for policy makers, government employees, business executives, professionals, researchers and academics alike looking to affect change to global climate and energy policies. Carsharing Services. A potential analysis of alternative business models in the automotive industry Christian Acht, 2016-04-18 Seminar paper from the year 2015 in the subject Business economics Business Management Corporate Governance grade 1.3 University of Marburg Research Group Technology and Innovation Management course Tutorial language English abstract Carsharing is rapidly growing service that gains more and more acceptance among car drivers By now alternative business models exist in search of new customers This term paper aims to evaluate the potential of alternative carsharing business models in the automotive industry Therefore it will first set theoretical foundations by introducing different forms of carsharing and business model concepts In a second step dominant forms will be exemplified by applying it to a business model framework In a last step the author will make use of a SWOT analysis to examine potentials of each carsharing business model This paper will exclusively concentrate on business to customer carsharing services on the German market Other forms of the shared mobility will not be considered Carsharing is a special form of the so called access based consumption It refers to transactions that are market mediated but without transfer of property The term carsharing or short term auto use describes a principle where individuals gain advantage from private car use without the costs and commitments of ownership Core characteristics are a short rental period simple access to vehicles and good transition to other forms of mobility This way of utilization is applicable for intermediate travel and routine activities Even though carsharing emerged in Europe between the 1940s and 1980s it ultimately became popular in the 1990s Since then it is spreading and growing all over the continent Among others one crucial factor for this development is that by 2020 55 per cent of the world population is expected to live in cities which will lead to considerable space infrastructure and environmental problems Thus the possession of a private car becomes more and more unattractive as overstrained infrastructures make a smooth flow of traffic impossible Carsharing has to be distinguished from other types of shared mobility solutions like ride sharing concepts such as Uber which are not treated in this paper
