resource **Senseless Violence and Its Ramifications** Ami Rokach, 2018-10-22 The baby boomer generation grew up in the 1950s when there existed the general belief that the Cold War was the greatest threat to the world order and a frightening possibility. It was difficult to believe then that it could get worse but the same threat of violence is now a daily occurrence around the globe. People are being shot, slaughtered, maimed and disappear for a multitude of reasons none having any connection most of the time with the victims. The scale of loss when these tragedies occur is devastating leaving the public as well as policy makers and legislators scrambling for solutions, clarification and understanding of how we have become a society where violence is so rampant, so frequent and so senseless. This book includes contributions by leading experts on violence and its ramifications who review the devastation, reasons and consequences of violence which is senseless, cruel and aims to hurt and destroy anyone in its path. This book was originally published as a special issue of *The Journal of Psychology*. **Crime Control in America** John L. Worrall, 2006 Can business activity in itself be morally good and pleasing to God? Sometimes business can seem so shady, manipulating the bottom line, deceiving the consumer or gaining promotions because of whom you know. But Wayne Grudem introduces a novel concept: business itself glorifies God when it is conducted in a way that imitates God's character and creation. He shows that all aspects of business including ownership, profit, money, competition and borrowing and lending glorify God because they are reflective of God's nature. Though Grudem isn't naive about the easy ways these activities can be perverted and used as a means to sin, he knows that Christians can be about the business of business. This biblically based book is a thoughtful guide to imitating God during interactions with customers, coworkers, employees and other businesses. See how your business and your life in business can be dedicated to God's glory.

Criminal Justice John R. Fuller, 2013 *Criminal Justice: Mainstream and Crosscurrents* uses a distinctive crosscurrents theme to teach students about the complexities of the criminal justice system and help them think critically about critical issues. **Social Problems** Donileen R. Loseke, Joel Best, 2017 This collection of focused essays is directed at several levels of students of social problems. It is accessible to the uninitiated who are not familiar with the constructionist literature and aimed at those who are not particularly interested in subtle theoretical and empirical issues of concern to academics studying social problems from constructionist perspectives. Some readings focus on the construction of problems by scientists and other professionals; others examine the work of social activists, mass media and social service personnel. Among the topics included are studies of social inequalities and individual deviance, a comparison of the images of social problems in the United States with those in other countries and an examination of the importance of politics and power in constructing public images of social problems. Constructionist perspectives have become the leading theoretical approach for sociology and allied fields in studying social problems. Yet constructionist impact on the teaching of social problems has been far less dramatic. Undergraduate courses on social problems are often subject to a theoretical barrage of eclectic perspectives. Just as the first social problems textbooks did almost a century ago, textbooks continue to present a series of unrelated chapters each devoted

to a particular social problem Social Problems is an effort at systematic analysis rather than random thought on the subject Social Problems presents detailed case studies demonstrating how constructionist perspectives can actually be applied to understand particular social problems While these articles can be read alone the editors have organized these selections to correspond with the chapter topics in the second edition of Donileen Loseke s Thinking about Social Problems an accessible introduction to constructionist approaches At the same time some instructors who use this edited collection might wish to provide their own mix to the selection process Many of the contributions make multiple points and so reasonably could be used to illustrate other basic texts or classic studies in the field of social problems Donileen R Loseke is professor of sociology at the University of South Florida Joel Best is professor and chair Department of Sociology and Criminal Justice University of Delaware He has also served as an advisory editor for Aldine in the area of social problems **Popular**
