**Ludicrous** Edward Niedermeyer, 2019-08-20 Tesla is the most exciting car company in a generation but can it live up to the hype Tesla Motors and CEO Elon Musk have become household names shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom The company's market valuation now rivals that of long established automakers and to many industry observers Tesla is defining the future of the industry But behind the hype Tesla has some serious deficiencies that raise questions about its sky high valuation and even its ultimate survival Tesla's commitment to innovation has led it to reject the careful zero defects approach of other car manufacturers even as it struggles to mass produce cars reliably and with minimal defects While most car manufacturers struggle with the razor thin margins of mid priced sedans Tesla's strategy requires that the Model 3 finally bring it to profitability even as the high priced Roadster and Model S both lost money And Tesla's approach of continually focusing on the future even as commitments and deadlines are repeatedly missed may ultimately test the patience of all but its most devoted fans In Ludicrous journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day to day realities of the company and the cars it produces Blending original reporting and never before published insider accounts with savvy industry analysis Niedermeyer tells the story of Tesla as it's never been told before with clear eyes objectivity and insight

**Artificial Unintelligence** Meredith Broussard, 2018-04-27 A software developer's misadventures in computer programming machine learning and artificial intelligence reveal why we should never assume technology always get it right In Artificial Unintelligence Meredith Broussard argues that our collective enthusiasm for applying computer technology to every aspect of life has resulted in a tremendous amount of poorly designed systems We are so eager to do everything digitally hiring driving paying bills even choosing romantic partners that we have stopped demanding that our technology actually work Broussard a software developer and journalist reminds us that there are fundamental limits to what we can and should do with technology With this book she offers a guide to understanding the inner workings and outer limits of technology and issues a warning that we should never assume that computers always get things right Making a case against technochauvinism the belief that technology is always the solution Broussard argues that it's just not true that social problems would inevitably retreat before a digitally enabled Utopia To prove her point she undertakes a series of adventures in computer programming She goes for an alarming ride in a driverless car concluding the cyborg future is not coming any time soon uses artificial intelligence to investigate why students can't pass standardized tests deploys machine learning to predict which passengers survived the Titanic disaster and attempts to repair the U S campaign finance system by building AI software If we understand the limits of what we can do with technology Broussard tells us we can make better choices about what we should do with it to make the world better for everyone
