2.0 in processes of a sustainable change Prof. Dr. Michael Kurwan, 2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2 0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover

Masterarbeit aus dem Jahr 2024 im Fachbereich Soziologie Wirtschaft und Industrie Note 1,7 Universität Hamburg Fakultät für
Wirtschafts- und Sozialwissenschaften Sprache Deutsch Abstract Im Zeitalter der digitalen Transformation gewinnt der
Einsatz künstlicher Intelligenz KI in wirtschaftlichen und gesellschaftlichen Prozessen zunehmend an Relevanz Diese Arbeit
widmet sich einer systematischen Untersuchung der ethischen Dimensionen des KI-Einsatzes im Bereich der
Personalbeschaffung und leistet damit einen wesentlichen Beitrag zur Etablierung fundierter ethischer Leitlinien für den
Umgang mit modernen Technologien Im Zentrum der Analyse steht die Frage inwieweit KI-Systeme als rationale Agenten
nicht nur komplexe Datensätze effizient verarbeiten sondern gleichzeitig auch unbeabsichtigt bestehende Vorurteile etwa in
Bezug auf Geschlecht Herkunft oder Religion verstärken können Die inhärente Intransparenz vieler algorithmischer
Entscheidungsprozesse wirft dabei dringende Haftungs- und Regulierungsproblematiken auf die einer kritischen
wissenschaftlichen Betrachtung bedürfen Der methodische Rahmen dieser Studie stützt sich auf theoretische Ansätze wie die
Theorie der sozialen Konstruktion von Technologie SCOT sowie das Konzept der reflexiven Innovation Diese Modelle ermöglichen eine differenzierte Analyse der Interdependenzen zwischen Entwickler:innen Anwender:innen und
Regulierungsinstitutionen Empirische Erkenntnisse gewonnen aus Fallstudien unterschiedlicher Unternehmen illustrieren

Personalentscheidungen stets im Spannungsfeld zwischen Effizienzsteigerung und dem Risiko systematischer Diskriminierung zu betrachten ist Vor diesem Hintergrund werden konkrete Handlungsempfehlungen formuliert die den Schutz individueller Rechte mit der Notwendigkeit betrieblicher Innovation in Einklang bringen Dieses Werk richtet sich an ein akademisch orientiertes Publikum sowie an Entscheidungsträgerinnen in Wirtschaft und Politik die an einer ethisch fundierten Implementierung von KI Technologien interessiert sind Es bietet einen theoretisch und empirisch untermauerten Beitrag zur Diskussion um die gesellschaftliche Verantwortlichkeit im digitalen Zeitalter und fördert die Entwicklung einheitlicher ethischer Standards für den Einsatz von KI in der Arbeitswelt
