An International Regime for Marine Scientific Research Montserrat Gorina-Ysern, 2021-11-22 This book An International Regime for Marine Scientific Research provides a comprehensive and multi disciplinary study of the International Regime for Marine Scientific Research Montserrat examines lingering North South disagreements on the scope of regulation how these are exacerbated by unprecedented marine science methodology and technological developments and explores means to encourage greater MSR cooperation and negotiation Published under the Transnational Publishers imprint Marine Scientific Research and the Regulation of Modern Ocean Data Collection Activities under UNCLOS Chuxiao Yu, 2022-10-17

The scope of marine scientific research has long been debated due to a lack of definition of the term in the United Nations Convention on the Law of the Sea UNCLOS The introduction of new forms and methods of ocean data collection adds another layer of legal uncertainty in this field Marine Scientific Research and the Regulation of Modern Ocean Data Collection Activities Under UNCLOS thus strives to identify the possible limits of the existing legal framework mainly the UNCLOS marine scientific research regime and the ways in which the identified gaps can be bridged In the analysis Chuxiao Yu carries out two case studies one on access to marine genetic resources and the other on operational oceanographic activities

Marine Scientific Research Florian Wegelein, 2005-06-01 The present analysis examines the legal framework for marine scientific research with a focus on research platforms Oceanographers find themselves faced with a complex set of provisions governing their activities not only in waters of foreign jurisdiction As the riches of the oceans have become known to decision makers in coastal States international action has set the course for an ever tighter regulation of the sea uses Part XIII is analysed with respect to the remaining freedoms of research In addition the book provides an overview of air and space law relevant to research activities and their relationship with the 1982 LOS Convention Other international instruments are analysed for their significance in the context of customary law Examination of possible safeguards for research activities contained in Part XIII and XV dispute settlement complements the legal analysis of the 1982 LOS Convention Mutual trust and co operation within regional organizations are in conclusion the most promising avenues for a more favourable research climate The book addresses a legal and scientific audience which at a practical or academic level deals with the law of the sea at large and the regime of marine scientific research in particular Marine Scientific Research Neal Robert
