Executive Summary

The current situation with the extent of workforce aging in the UK has become a troubling tendency. While the range of staff members that have approached the category of aging employees has risen, the number of younger employees has been shrinking. The phenomenon of aging workforce can be attributed to numerous factors, yet it leads to the same problem of the quality of UK's economic performance dropping constantly. Therefore, a policy that would help to galvanize organizational performance, at the same time taking the health needs of the aging employees into consideration, is needed desperately.

The integration of business investment strategies that will help to invest in the further training and development of employees alongside with the tools for increasing the extent of opportunities for talent management and the introduction of incentives for staff members. The specified measure will help to increase the performance across the UK organizations in every industry, at the same time paying due attention to the needs and requirements of employees that are experiencing health issues due to their age. The policy designed to improving productivity growth are expected to lead to tangible positive changes in the current UK economy, affecting the situation positively.

There are several options to managing the issue at hand. Apart from the enhancement of the employee engagement rates through the introduction of incentives, one should also consider the strategies aimed at creating better workplace conditions and offering effective healthcare

but taking advantage of this window of opportunity will require new research to shed light on the status and needs of the aging population. Currently the research base on aging in this region is relatively underdeveloped. This book identifies several key topics for research to inform public policy including changing roles in the family, labor force participation, income and savings, and health and well-being of the public.

Emerging Issues in Public Policy, 2000 *Time, Politics, and Policies* Burdett A. Loomis, 1994. Loomis observed the politics of policymaking in Kansas from May 1988 through May 1989. Using specific examples, he shows how deadlines occur in regular, predictable patterns in the development of issues in subsequent policy decisions and explains how they ultimately narrow the choices presented to any legislative body. Public Policy and the Aging William W. Lammers, 1983. Abstract. Public policy areas that affect the aging in complex ways are examined and assessed for policy analysts and decision makers. The relevant issues caused by shifts in federal and state government roles are considered. The tension between means and incomes for current and future programs affecting the aging, the special problems of older women, the hospice movement, safer environments, the aging as consumers, and the consequences of inflation are all analyzed. Specific topics include policy making factors, social security, employment, retirement, and pension policies, health and long-term care policies, including Medicaid and Medicare, social services, and housing policies. The effects of policies of the 1980s and the future on the US aging population are discussed. Major programs affecting the aging are extensively analyzed, and alternatives are considered. A glossary and bibliography are appended.

wz *Public Policy Praxis--theory and Pragmatism* Randall S. Clemons, Mark K. McBeth, 2001. For courses in Public Policy and Policy Analysis. This readable and conceptual approach to public policy carefully balances theory and practice, unlike most other texts which either lack theory or lack practicality. The authors combine positivist and postpositivist perspectives on policy analysis, supported by interesting and useful teaching cases. Fully classroom tested, the text material explores the political basis of policy making and analysis with a careful eye toward students' practical needs. Models and tools are provided along with the analytical knowledge necessary for policy analysis. Carefully structured chapters offer instructors maximum ease and flexibility in the classroom.

Women's Equality, Demography and Public Policies A. Heitlinger, 1993-09-07. Rather than assuming as so many demographers and feminists have done that promoting women's equality and elevating birth rates is incompatible, Alena Heitlinger argues that there is no inherently antagonistic relationship of this sort and that there may be mutually compatible pronatal and gender equality policies. Based on comparative data from Canada, Australia, Britain, and to a more limited extent the USA, her study examines the impact of major international instruments promoting women's equality and national similarities and differences in women's policy machinery, provision for maternity and childcare, fiscal assistance for families with children, and the costs and benefits of fertility-related measures vis-à-vis immigration-related measures. The

author concludes that broadly conceived measures to achieve equal opportunity can provide a new quite powerful justification for policies which in other contexts may be called pronatalist For the most part pronatalist intent has been non-existent but the potential for higher fertility is significant **Soviet Social Policies: Welfare, Equality, and Community**
