

The background of the slide is a vibrant yellow. It is decorated with several large, stylized arrows pointing upwards. These arrows are in shades of orange and red, with some overlapping each other. At the bottom center of the slide, there is a white silhouette of a classical building dome, resembling the U.S. Capitol. The overall design conveys a sense of growth, progress, and upward movement.

Attach to your letters and correspondence to explain why you have no reportable income *Eminent Domain Use and Abuse*  
Dwight H. Merriam,Mary Massaron Ross,2006 As we continue in an era of simultaneous innovation and commoditization enabled by digital technologies managers around the world are asking themselves how can we both adapt to rapid changes in technology and markets and still make enough money to survive and thrive To provide answers to these important and urgent questions MIT Sloan School of Management Professor Michael Cusumano draws on nearly 30 years of research into the practices of global corporations that have been acknowledged leaders and benchmark setters including Apple Intel Google Microsoft Toyota Sony Panasonic and others in a range of high technology services and manufacturing industries These companies have also encountered major challenges in their businesses or disruptions to their core technologies If we look deeply enough he contends we can see the ideas that underpin the management practices that make for great companies and drive their strategic evolution and innovation capabilities From his deep knowledge of these organizations Cusumano distills six enduring principles that he believes have been in various combinations crucial to their strategy innovation management practices and ability to deal with change and uncertainty The first two principles platforms not just products and services especially for product firms are relatively new and broader ways of thinking about strategy and business models based on Cusumano s latest research The other four capabilities not just strategy or positioning the pull concept not just push economies of scope not just scale and flexibility not just efficiency all contribute to agility which is a mix of flexibility and speed Many practices associated with these ideas such as dynamic capabilities just in time production iterative or prototype driven product development flexible design and manufacturing modular architectures and component reuse are now commonly regarded as standard best practices These six enduring principles are essential in a new world dominated by platforms and technology enabled services *Hearings Before the Employers' Liability and Workmen's Compensation Commission ... Land Rights and Expropriation in Ethiopia Daniel W. Ambaye,2015-02-13 This thesis provides a new approach to the Ethiopian Land Law debate The basic argument made in this thesis is that even if the Ethiopian Constitution provides and guarantees common ownership of land together with the state to the people this right has not been fully realized whether in terms of land accessibility enjoyability and payment of fair compensation in the event of expropriation Expropriation is an inherent power of the state to acquire land for public purpose activities It is an important development tool in a country such as Ethiopia where expropriation remains the only method to acquire land Furthermore the two preconditions of payment of fair compensation and existence of public purpose justifications are not strictly followed in Ethiopia The state remains the sole beneficiary of the process by capturing the full profit of land value while paying inadequate compensation to those who

cede their land by expropriation Secondly the broader public purpose power of the state in expropriating the land for unlimited activities puts the property owners under imminent risk of expropriation      **The International Law on Foreign Investment** M.
