Power, Culture, and Family-School Relations Jen Stacy, 2025-01-30 Power Culture and Family School Relations Towards Culturally Sustaining Practices explores the extent to which common practices in school based family outreach advance equity or sustain the status quo in power and cultural relations Using a rich ethnographic account of a school based family literacy program in Nebraska the book unfolds the daily cultural practices of the program so that readers may visualize and contemplate how and if the program serves newcomer and refugee families within the unique context of the New Latine Diaspora The author draws upon critical theory to showcase how neoliberal and deficit ideologies are at play throughout the different aspects of the program the influence these ideologies have on the participants and the tactics used by the caregivers to resist and change the programmatic structures and curriculum to meet their needs As such the book invites educators administrators and scholars into the nebulous and difficult conversation about how schools paradoxical entities that often colonize but prospectively liberate must not just rethink how they work with parents and caregivers but rather dismantle traditional cultural practices that seek to assimilate minoritized families Showcasing the power of ethnography as a tool which can be used to support educators and scholars to understand cultural elements of family outreach programs on a semiotic level and how transforming these semiotic building blocks can lead to equitable relationships it will appeal to scholars and researchers with interests in adult education social foundations of education critical ethnography multilingual Adult Basic Education and family outreach

Understanding Working Memory Tracy Packiam Alloway, Ross G. Alloway, 2014-10-27 It is hard to conceive of a classroom activity that does not involve working memory our ability to work with information In fact it would be impossible for students to learn without working memory From following instructions to reading a sentence from sounding out an unfamiliar word to calculating a math problem nearly everything a student does in the classroom requires working with information Even when a student is asked to do something simple like take out their science book and open it to page 289 they have to use their working memory Most children have a working memory that is strong enough to quickly find the book and open to the correct page but some don't approximately 10% in any classroom A student who loses focus and often daydreams may fall in this 10% A student who isn't living up to their potential may fall in this 10% A student who may seem unmotivated may fall in this 10% In the past many of these students would have languished at the bottom of the class because their problems seemed insurmountable and a standard remedy like extra tuition didn't solve them But emerging evidence shows that many of these children can improve their performance by focusing on their working memory Working memory is a foundational skill in the classroom and when properly supported it can often turn around a struggling student's prospects This book will make sure you are able to spot problems early work with children to improve their working memory and ensure they reach their full potential How does the book work Each of the following chapters includes a description of the learning difficulty WHAT followed by an inside look into the brain of a student with the disorder WHERE their unique

working memory profile WHY and classroom strategies to support working memory HOW There are two types of strategies general working memory strategies that can be applied to all students in your class and specific working memory strategies for each learning difficulty The final chapter Chapter 9 provides the student with tools to empower them along their learning journey The aim in supporting students with learning difficulties is not just to help them survive in the classroom but to thrive as well The strategies in the book can provide scaffolding and support that will unlock their working memory potential to boost learning They are designed to be easily integrated within the classroom setting as a dimension of an inclusive curriculum and used in developing an individualized education program IEP for the student The strategies recommended here can also complement existing programs that support a core deficit such as a social skills program for a student with autistic spectrum disorder or behavior modification for those with ADHD Each chapter also includes Try It box Provides the reader with an opportunity to have a hands on understanding of the material Science Flash box Gives the reader a snapshot of current and interesting research related to each chapter Current Debate box Discusses a controversial issue pertaining to the disorder Tracy Packiam Alloway is an award winning psychologist based at the University of North Florida Ross Alloway is the CEO of Memosyne Ltd a company that brings cutting edge scientific research to parents *Mathematical Thinking at Grade 2* Karen Economopoulos, Anne Goodrow, 1997-06 **Annual Report of the President of Harvard University to the Overseers on the State of the University for the Academic Year ...** Harvard University, 1877 *Report of the President of Harvard College and Reports of Departments* Harvard University, 1877 Annual Report of the Regents, 1880 Annual Report of the Regents University of the State of New York, 1881 No 104 117 contain also the Regents bulletins **The Deseret Weekly**, 1890 **Documents of the Senate of the State of New York** New York (State).
