Weaknesses of the Amazon Marketplace. Which factors contribute to the fact that suppliers are increasingly looking for new trading platforms? Manuel Weber, 2021-03-30 Seminar paper from the year 2021 in the subject Business economics Trade and Distribution grade 2.0 Private University Schloss Seeburg language English abstract The aim of this research was to identify the reasons that lead Amazon sellers to move away from the marketplace and look for alternative opportunities Derived from this the research question arises Which factors contribute to the fact that suppliers are increasingly looking for new trading platforms as an alternative to the Amazon marketplace With the help of a literature research of theory and practical context hypotheses were developed which were examined by means of an expert interview Amazon is one of the largest companies in this age With its marketplace Amazon can generate the greatest reach in order to reach customers The problem that retailers currently have to deal with are on the one hand the extremely high fees that you have to pay to Amazon in order to be listed on the market at all and on the other hand the customer friendly and retailer unfriendly service from Amazon especially for complaints and returns is increasingly no longer acceptable for many retailers This means that many retailers have to look for alternative sales opportunities in order to remain competitive However it is extremely difficult to create such a simple and customer friendly online shop as Amazon or to find an alternative with the same large reach as Amazon Transforming Scholarly Publishing With Blockchain Technologies and AI Gunter, Darrell Wayne, 2021-06-18 Every industry will be positively affected by blockchain and AI technology at some point However blockchain is a misunderstood technology within the publishing realm The scholarly publishing industry can significantly improve the flow of research drive down costs and introduce new efficiencies in the publishing industry with these new technologies The scholarly publishing industry is in its early days of the digital transformation and blockchain and AI technology could play a major role in this However the industry has been resistant to change These reasons include but are not limited to staying with legacy systems cost of new platforms changing cultures and understanding and adopting new technologies With proper research and information provided the publishing industry can adopt these technologies for beneficial advancements and the generation of a bright future Transforming Scholarly Publishing With Blockchain Technologies and AI explores the changing landscape of scholarly publishing and how blockchain technologies and AI are slowly being integrated and used within the industry This book covers both the benefits and challenges of implementing technology and provides both cases and new developments Topics highlighted include business model developments new efficiencies in scholarly publishing blockchain in research libraries knowledge discovery and blockchain in academic publishing This book is a valuable reference tool for

publishers IT specialists technologists publishing vendors researchers academicians and students who are interested in how blockchain technologies and AI are transforming and developing a modern scholarly publishing industry *Amazon KDP*
