Surfacing best practices for AI software development and integration in healthcare Mark Sendak,Suresh Balu,Xiao Liu,Karandeep Singh,Sylvia Trujillo,David Vidal,2023-06-08 *Technosleep* Catherine Coveney,Michael Greaney,Eric L. Hsu,Robert Meadows,Simon J. Williams,2023-06-25 This book draws on a variety of substantive examples from science technology medicine literature and popular culture to highlight how a new technoscientifically mediated and modified phase and form of technosleep is now in the making in the global north at least and to discuss the consequences for our relationships to sleep the values we accord sleep and the very nature and normativities of sleep itself The authors discuss how technosleep at its simplest denotes the coming together or entanglements of sleep and technology and sensitizes us to various shifts in sleep technology relations through culture time and place In doing so it pays close attention to the salience and significance of these trends and transformations to date in everyday night life their implications for sleep inequalities and the related issues of sleep and social justice they suggest

Cybersecurity in the Age of Artificial Intelligence Pasi Koistinen,2025-07-12 Artificial intelligence has stopped knocking politely on the door of cybersecurity it has kicked it open set up shop inside and begun rewriting the rules From generative phishing emails indistinguishable from trusted colleagues to adaptive malware that evolves faster than defenders can react AI has made the threat landscape faster smarter and far less predictable This book is a practical guide to that unsettling reality It doesn t trade in hype or hand waving optimism Instead it lays out in plain language how AI systems create new risks

what happens when security practices built for deterministic software fail and why human vigilance and organizational discipline are more important than ever Inside you ll discover How attackers are already using AI to automate reconnaissance generate malicious code and industrialize social engineering at a scale no human team could match Why defending AI is a fundamentally different challenge with attack surfaces embedded in training data model weights and seemingly innocuous prompts How familiar safeguards like static rules perimeter defenses and blacklists fall apart when faced with systems that learn infer and sometimes hallucinate What it takes to design secure trustworthy AI systems from threat modeling and auditing pipelines to deploying explainable models that don t sacrifice accountability for convenience Written for security leaders engineers policymakers and technologists who recognize that the convergence of AI and cybersecurity isn t theoretical it s already operational this book offers a strategic roadmap for navigating a landscape where yesterday s defenses are no longer enough You ll explore real world case studies chatbots leaking confidential data with alarming politeness AI driven phishing campaigns that slip past even well trained employees and defensive models that fail silently because they can t explain their own reasoning Along the way you ll learn frameworks to separate the promising from the perilous the actionable from the aspirational Artificial Intelligence Cybersecurity isn t a manual for fine tuning models or a primer for beginners It assumes you already sense that something is shifting and provides the clarity examples and strategies to respond If you re responsible for securing critical systems or shaping the policies that govern them this book will help you ask better questions make better decisions and avoid the costly mistake of treating AI as just another line item in your technology stack Because in this new era the question isn t whether AI will reshape your security strategy The question is whether you ll be ready when it does

Security and the Networked Society Mark A. Gregory, David Glance, 2014-07-08 This book examines technological and social events during 2011 and 2012 a period that saw the rise of the hacktivist the move to mobile platforms and the ubiquity of social networks It covers key technological issues such as hacking cyber crime cyber security and cyber warfare the internet smart phones electronic security and information privacy This book traces the rise into prominence of these issues while also exploring the resulting cultural reaction The authors analysis forms the basis of a discussion on future technological directions and their potential impact on society The book includes forewords by Professor Margaret Gardner AO Vice Chancellor and President of RMIT University and by Professor Robyn Owens Deputy Vice Chancellor Research at the University of Western Australia Security and the Networked Society provides a reference for professionals and industry analysts studying digital technologies Advanced level students in computer science and electrical engineering will also find this book useful as a thought provoking resource
