 history of science discipline is contributing valuable knowledge of the culture of soil understanding of the conditions in  
 society that fostered the ideas and of why they developed in certain ways This book is about the progressive footprints made  
 by scientists in the soil It contains chapters chosen from important topics in the development of soil science and tells the  
 story of the people and the exciting ideas that contributed to our present understanding of soils Initiated by discussions  
 within the Soil Science Society of America and the International Union of Soil Sciences this book uniquely illustrates the  
 significance of soils to our society It is planned for soils students for various scientific disciplines and for members of the  
 public who show an increasing interest in soil This book allows us to answer the questions How do we know what we know  
 about soils and How did one step or idea lead to the next one The chapters are written by an international group of authors  
 each with special interests bound together by the central theme of soils and how we came to our present understanding of  
 soils Each concentrate on soil knowledge in the western world and draw primarily on written accounts available in English  
 and European languages Academics graduate students researchers and practitioners will gain new insights from these  
 studies of how ideas in soil science and understanding of uses of soils developed Discusses tracing soils knowledge  
 accumulated from Roman times first by soil users and after 1800s by scientists Offers ideas about how soils knowledge was

influenced by the social context and by human needs Combines the history of ideas with scientific knowledge of soils Written by chapter authors who combine subject matter expertise with knowledge of practical soil uses and provide numerous references for further study of the relevant literature *Centres of Plant Diversity: Europe, Africa, South West Asia, and the Middle East* World Wide Fund for Nature,1994 Volume 1
