O BRAVE 'NEW NORMAL' WORLD: Living with Coronavirus Steve Gleadhill, 2025-10-14 It is ironic that having spent several thousand years subjugating all other life forms so we could become the dominant species we have wilfully ceded our hard won authority over our fellow animals to inanimate technology In many cases we have become so blindly reliant on machines that we have stopped using our own wits to the point where our brains are becoming dangerously redundant We hardly need to think for ourselves at all This vacuous mentality that we seem to be embracing is pervading all aspects of our behaviour and society The rise of AI that now exceeds our own intelligence raises new ethical and existential dilemmas As we develop synthetic minds we will need to weigh up how we design them what we allow and don't allow them to do and crucially how to ensure their needs are aligned with our own Meanwhile humanity is waging a suicidal war on the natural world according to secretary general of the UN Antonio Guterres which also ultimately jeopardises our very existence

History of the Japanese Video Game Industry Yusuke Koyama, 2023-06-02 This book is the first one to describe the entire history of the video game industry in Japan The industry consists of multiple markets for PCs home consoles arcades cellular phones and smart phones and it is very difficult to see the complete picture The book deals comprehensively with the history of the Japanese game industry from the beginning of the non computer age to the present The video game industry in Japan was established in the arcade game market when Space Invaders was released by Taito in 1978 Game markets for both PCs and home consoles followed in the early 1980s The platform that occupies a central market position started with the arcade and shifted in order to the home console handheld consoles and smart phones In the video game industry in the twentieth century each platform had a clear identity and the relationships among platforms were interactions In the twenty first century with the improvement of computer performance the platform identity has disappeared thus the relationship among platforms is highly competitive Since the crash of 1983 in the United States the Japanese game industry has one of the largest market shares in the world and has developed without being influenced by other countries It reached its peak in the late 1990s and then its relative position declined due to the growth of foreign markets and the failure of emerging markets such as online PC games Even today Japan's gaming industry holds a dominant position in the world but it is not the superpower it once was Since the beginning of the twenty first century game research has become active worldwide Among game researchers there is a large demand for research on games in Japan but there is still little dissemination of research in English The original version of this book published in Japan is highly regarded and received an award for excellence from the Society of Socio Informatics in 2017
