**Relationships** Dean Victor Williamson,2019 Do institutions matter in economic theory Or is the economic analysis of institutions a distraction from the most important action Indeed does Vernon Smith s notion of the institution free core of formal economic theory encompass that most important action To explore this question this book opens with an informal tour of the economics of system design out of which an economics of adaptation ultimately emerged The book then offers explorations via the application of the economics of adaptation in both law and economics relating to how parties manage relationships within the firm within the context of long term contracts and most vividly within the context of antitrust conspiracy      *United States v. Apple* Chris Sagers,2019-09-17 One of the most followed antitrust cases of recent times

*United States v Apple* reveals an often missed truth what Americans most fear is competition itself In 2012 the Department of

Justice accused Apple and five book publishers of conspiring to fix ebook prices The evidence overwhelmingly showed an unadorned price fixing conspiracy that cost consumers hundreds of millions of dollars Yet before during and after the trial millions of Americans sided with the defendants Pundits on the left and right condemned the government for its decision to sue decrying Amazon s market share railing against a new high tech economy and rallying to defend beloved authors and publishers For many Amazon was the one that should have been put on trial But why One fact went unrecognized and unreckoned with in practice Americans have long been ambivalent about competition Chris Sagers a renowned antitrust expert meticulously pulls apart the misunderstandings and exaggerations that industries as diverse as mom and pop grocers and producers of cast iron sewer pipes have cited to justify colluding to forestall competition In each of these cases antitrust law a time honored vehicle to promote competition is put on the defensive Herein lies the real insight of United States v Apple If we desire competition as a policy we must make peace with its sometimes rough consequences As bruising as markets in their ordinary operation often seem letting market forces play out has almost always benefited the consumer United States v Apple shows why supporting cases that protect price competition even when doing so hurts some of us is crucial if antitrust law is to protect and maintain markets
