College Coaches and Teaching Civil Society Literacy Daniel R. Gilbert Jr.,2025-09-29 This is a book about a treasure hidden on college campuses across the United States This treasure is the expertise that college coaches acquire as they do their life work in intercollegiate athletic competition In their work coaches routinely join to sustain relationships among parties who hold very different interests as they meet in scheduled athletic competition This expertise is a treasure for General Education because General Education entails preparing adults to live thoughtfully and with civility in the company of one another This treasure is hidden because coaches are customarily ineligible to teach in the academic program The author shows that such exclusion is optional He charts a pathway for bringing coaches off the bench and into General Education teaching He presents plans with which college faculty and coaches can join to assemble texts for teaching learners about claiming places in something larger than career and familiar comfort In the precise grammar of these texts the author demonstrates that college coaches are positioned to contribute comprehensively to the advancement of General Education

The Unanimous Champions of College Football, 1869-2019 Robert J. The Official National Collegiate Athletic Association Football Guide National Collegiate Athletic Association,1974 **The Anatomy of a Game** David M. Nelson,1994 This is the first football history to chronicle year by year how playing rules developed the game Football a four dimensional game of rushing kicking forward passing and backward passing has had more playing rule changes since its inception than any other sport The Anatomy of a Game follows football rules from the game s European roots through its beginning in the United States to its position as the number one spectator sport in the 1990s Highlighted are details of the crisis years that changed the character of the game with coaches and rules committee members the featured players David M Nelson who served on the NCAA Rules Committee longer than Walter Camp provides personal insight into all Rules Committee meetings since 1958 as well as an appendix chronological and by rule listing every change since 1876 Ever since the first two human beings kicked threw or batted an object competitively there have been playing rules Games are mentioned in the Bible and the Romans brought football s forerunner to Britain from where it was exported to the United States It was in the United States that college students decided to make their game rugby rather than soccer Although the students invented United States football and made the first rules their ruling power was eventually lost

to the faculty administrators coaches rules committees and the NCAA Beginning as a brutal sport football survived several crises before and after the turn of the century eventually becoming respectable The 1931 injury crisis split the high school and college rules and the same year the professionals went their own way with rules largely based on spectator appeal Today the sport is a national treasure primarily because of its playing rules over seven hundred in total which make college football unique among the world s team sports Moreover football remains an American game never having the same impact in other countries as do baseball and basketball Rules make the game but people make the rules Football survived the major crises that threatened the game because committee members adhered to the precepts that had governed football since its inception The game began with an attempt to have a consistent code of justice personal accountability and equality In some sense the playing rules are a type of moral precept that explains in the simplest terms what can and cannot be done The Football Code which first prefaced the rules in 1916 makes the game more than any other sport a moral one because it sets standards for coaching playing sportsmanship and officiating

Justice and American Intercollegiate Athletics Daniel R. Gilbert Jr.,2025-09-03 This is a book about athletic competitors belonging to something larger than their accustomed and immediate pursuits The centerpiece of this book is an accomplishment of justice in the routine conduct of American intercollegiate athletics This accomplishment was a resilient assembly of intercollegiate athletic competitors who sustained bilateral playing relationships and concurrently ventured into playing relationships outside their circle This was a just arrangement because participants tolerated one another s separate pursuits while affirming that they belonged to enduring playing relationships They affirmed such belonging through their bilateral scheduling practices Evidence of this justice accomplishment is abundant in hundreds of schedules This book contains two historical narratives about connected competitors departing one another s company to travel distinctive pathways In both narratives athletic competitors reestablished playing relationships from which they had departed Through their acts of connection departure and reconnection these competitors joined to create enduring patterns of centered belonging And they did this as athletic competitors whose interests were directly opposed
