A guide to owning an Electric Vehicle

The electric vehicle market is booming, with many people making the switch from petrol or diesel vehicles to electric and hybrid models. As the number of electric vehicle models widens, the driving range improves and prices drop making them more attractive, there are a variety of benefits for drivers making the switch. From the environmental impact to the savings you can make on fuel, tax and maintenance costs. This guide will identify some of the benefits of making the switch to electric and provide information on how you can ensure you are getting the most out of your electric vehicle.

THE BENEFITS OF SWITCHING TO ELECTRIC

Zero tailpipe emissions - by owning an electric vehicle you are helping to reduce pollution by emitting fewer greenhouse gasses and air pollutants (according to EDF Energy just 1 electric car on the roads can save an average of 1.5 million grams of CO2*), and with an increasing number of electric vehicle energy tariffs available you can charge your vehicle up knowing that the energy used is renewable too - win/win!

Lower running costs - electricity is still cheaper than fuel, so running an electric vehicle works out cheaper. It also has fewer mechanical parts meaning less can go wrong and repair costs are usually lower than a petrol or diesel car. There are tax benefits too - road tax for purely electric cars is currently £0. Some places offer free parking for electric vehicles too - worth looking out for!

Silence - Electric Vehicles are quiet - with no piston or engines moving at great speeds, electric vehicles are pretty much silent. You may notice wind and tyre noise but this is no louder than a conventional car it's just not being masked by the engine noise. Enjoy the peace and quiet!

Instant power - because there are no gears, electric vehicles are very efficient at delivering power to the motor and wheels and acceleration happens pretty much instantly.

Simple driving - there are no gears (well not in the traditional sense) - they have Drive (or Forwards) and Reverse - it's that simple!

Regenerative braking - when you lift your foot off the accelerator the car will begin to slow down using the friction in the braking system and returning some charge to the battery as it does so. On most electric vehicles, this feature can be adjusted or turned off if you don't like it!

Government grants - it is worth checking to see if you qualify for any of the Government grants or schemes that are in place to help people make the switch.
