Emergency Medical Services, 2000 **Colorado Learn and Serve**, 1996 **Reading and Reader Development** Judith Elkin, Briony Train, Debbie Denham, 2003 Reader development focuses on readers rather than reading skills The purposes of reader development are to enhance the reading experience to make it a more pleasurable and creative act for the reader to increase people s confidence in their reading and to make reading a more communal activity by bringing readers together to share their experiences The focus of reader development is pleasure reading which the authors interpret as reading fiction They observe that public libraries were not at the forefront of this movement but librarians are responding by changing library culture to focus on readers rather than

books The ways in which librarians responded and additional responses they could undertake are described within the context of the broader social movements in the United Kingdom to promote reader development Three themes dominate the chapters First the authors tirelessly celebrate reading Reading is good Reading will make one happy Reading elevates The second theme is opportunism If society is paying attention to reading librarians should get on board and seize the opportunity to build their status and to secure the place of libraries as critically important institutions The third theme is social inclusiveness Librarians should always keep in mind the political dimensions of public library service and assure that all sectors of the populations share in the benefits of library service Readers in search of guidance concerning what librarians should do will find plenty of that here EDITOR eBook Automotive Mechanics, Revised Edition MAY, SIMPSON, 2023-05-21 This market leading resource has been providing students with an introduction to the service diagnosis and repair of passenger and light commercial vehicles for over 48 years This revised edition now addresses the needs of students studying the qualifications AUR20520 Cert II in Automotive Servicing Technology and AUR30620 Certificate III in Light Vehicle Mechanical Technology Updated content includes extended coverage on electrical and hybrid vehicles The resource also now includes the chapter The environment and the automotive service industry within the text previously found online only The revised edition also includes QR codes at key sections that take students directly to instructional videos Video topics include dismantling an oil pump checking bearing oil clearance and checking engine valves amongst others The content ensures full coverage of the latest vehicle computer systems and diagnostic techniques The resource is available both in print and eBook versions and is complimented by a suite of online resources that provide students with practical tasks and quizzes to help them consolidate their learning Key Features Trusted and reliable content of the highest quality Language and use of images appropriate and suited to Certificate II and III students Covers all core units and the most popular electives from both the Certificate II and Certificate III courses A single volume course book that students will be able to refer to during and after their training Digital resources available for trainers to assist in the delivery of courses and for students to practice their skills and review their knowledge Now includes online video content to assist students understanding of key concepts Key line drawings have now been colour coded to aid student comprehension
