

TITLE		
Eliciting Student Voice: Connecting the classroom to the community through student driven service-learning.		
TARGET AUDIENCE	TIMES OFFERED	ACTIVITY #
Teachers of grades K-12	Session 2 10:45am – 12:15pm	Service Learning
DESCRIPTION		
<p>Need in Deed's mission is to use the classroom to prepare young people for civic responsibility and service to others, enabling them to become capable, contributing members of society. Working in Philadelphia public schools, we train and support teachers as they adopt a teaching and learning strategy known as service-learning. This workshop will briefly introduce participants to the My Voice framework for service-learning, a framework that serves as a guide to help teachers implement service-learning strategies in their classrooms. Workshop participants will take part in a sample activity that demonstrates a window into students' perspectives and begins to build awareness and shared vocabulary around community assets and challenges. A Need in Deed Teacher Network Member will then share their own strategies for building classroom community and integrating social justice issues into the curriculum.</p>

The Proper Role of Higher Education in a Democratic Society Bowhay, Vincent, 2021-06-25 American higher education has served to prepare students to be active participants in a democratic society During a time of great civil upheaval following the tumultuous elections of 2016 and 2020 the outbreak of the COVID 19 pandemic and mass demonstrations following the murders of George Floyd and Breonna Taylor higher education may be the only institution left to be both responsible for and responsive to society at large Public trust in the federal government is at near record lows but confidence in higher education has decreased more than any other U S institution since 2015 In a time where public opinion is quickly changing for the better or the worse higher education must respond to this decline in trust in it as an institution but also the decline in the belief that a college degree is worth the time and cost Higher education was founded on the idea that colleges would prepare citizens for a life of public service but they have quickly changed to a business model that largely puts profits over people Practitioners of higher education must respond to this lack of trust and the pressures of preparing a 21st century workforce while battling the threats of a pandemic declining enrollment budget destabilization and increased regulation The Proper Role of Higher Education in a Democratic Society reexamines the purpose of higher education during rapidly changing times offers practical advice and best practices to reclaim higher education s most fundamental mission and argues that if higher education is called to prepare students to serve a government by the people the people must be prepared to govern effectively This book provides resources and suggestions for restoring the public faith in higher education by connecting the educational experience with civic engagement outcomes Diverse perspectives presented in this book challenge traditional notions that civic engagement is handled by one office on a college campus and is only discussed during a presidential election Covering everything from civic engagement to diversity perspectives this book is ideal for higher education practitioners and those interested in promoting civic engagement and democratic participation improving assessment or accreditation standards using a civic engagement perspective and infusing civic engagement to diversity conversations on campus

Putting the Local in Global Education Neal W. Sobania, 2023-07-03 The position taken in this volume is that domestic off campus study can be just as powerful a transformative learning experience as study overseas and that domestic programs can equally expand students horizons their knowledge of global issues and processes their familiarity and experience with cultural diversity their intercultural skills and sense of citizenship This book presents both the rationale for and examples of study away an inclusive concept that embraces study abroad while advocating for a wide variety of domestic study programs including community based education programs that employ academic service learning and internships With the growing diversification regionally demographically culturally and socio economically of developed economies such as the US the local is potentially a doorstep to the planet and presents opportunities for global learning Moreover study away programs can address many of the problematic issues associated with study abroad such as access

finance participation health and safety and faculty support Between lower costs the potential to increase the participation of student cohorts typically under represented in study abroad the lowering of language barriers and the engagement of faculty whose disciplines focus on domestic issues study at home can greatly expand the reach of global learning The book is organized in five sections the first providing a framework and the rationale for domestic study way programs addressing administrative support for domestic vs study abroad programs exploring program goals organization structure assessment and continuous improvement and considering the distinct pedagogies of experiential and transformative education The second section focuses on Semester Long Faculty Led Programs featuring examples of programs located in a wide variety of locations from investigations into history immigration culture and the environment through localities in the West and the Lowcountry to exploring globalization in L A and New York Section three highlights five Short Term Faculty Led Programs While each includes an intensive immersive study away experience two illustrate how a 7 10 day study away experience can be effectively embedded into a regular course taught on campus The fourth section on Consortium Programs describes programs that are either sponsored by a college that makes its program available to consortium members and non members or is offered by an independent non for profit to which institutions send their students The final section on Community Engagement and Domestic Study Away addresses the place of community based education in global learning and provides examples of academic programs that employ service learning as a tool for collaborative learning focusing on issues of pedagogy faculty development and the building long term reciprocal relationship with community partners to co create knowledge The book is intended for study abroad professionals multicultural educators student affairs professionals alternative spring break directors and higher education administrators concerned about affordably expanding global education opportunities Management and Sustainability in the Belt and Road Andrew W.H. Ip,Lianne K.W.

Lam,2023-06-06 China s Belt and Road Initiatives BRI is an ambitious infrastructure project conceived in 2013 by President Xi Jinping with development and investment initiatives stretching from Asia and Europe that reflect the original Silk Road with business networks through countries such as Afghanistan Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan as well as India and Pakistan spanning a route of more than 4 000 miles and history that can be dated back more than 2 200 years Given the background of China s unique approach in fighting COVID 19 and against the backdrop of sluggish economic growth innovation and management sustainable development of BRI will be the key and the driving force for the post pandemic economic recovery of many countries especially as BRI countries now account for nearly 30% of China s foreign trade and 15% of outward direct investment The vision to create a vast network of railways energy pipelines highways and streamlined border crossings to expand the international use of Chinese currency and improve connectivity to China is good foresight and proved fortuitous when the COVID 19 pandemic came to plague the world and amid the conflicts between the United States and China as well as the war between Russia and Ukraine Since the inception of BRI many books

have been written to cover topics ranging from globalization to detailing how China's business and politics are a major motivation for China's overseas economic activities with case studies and practices yet few of these books provide a structured approach to the sustainable management of BRI projects This book is about how to manage the innovation sustainability and business necessary to make BRI work and how to handle the issues problems and crises that may arise in the process Participants of BRI projects can take on many different roles but ultimately it is team effort and leadership that creates successful projects Here readers will find guidelines and insights to survive and prosper in a myriad of BRI opportunities and risks Most important of all this book provides a glimpse of different approaches for success in BRI projects including sustainability environmental issues social and political aspects technology choice of industry project management education and training governance and many more
