Services And Resources For Children And Young Adults And Public Libraries:

Services and Resources for Children and Young Adults in Public Libraries Sheila Heaviside, 1995 the findings are presented of 1994 surveys on services and resources for children and young adults ages 12-18 in public libraries. Each survey was conducted with a different nationally representative sample of public libraries. Data was collected for individual buildings rather than for library systems. Findings indicate the following: 1 children and young adults represent 60% of public library patronage 2 30% of public librarians specialize in youth services 3 39% of libraries employ a children's librarian 11% have a young adult librarian and 24% have a youth services specialist on staff 4 30% of all public libraries have only one librarian on staff 5 ethnic diversity of children and young adult patrons has increased over 40% in the last 5 years 6 computer technologies are among the most heavily used children's and young adult resources in public libraries and are also the most scarce 7 many library programs primarily target preschool and kindergarten children 8 only 76% of public libraries report working with schools 9 only one in seven libraries offer homework assistance programs 10 11% of public libraries have neither a young adult collection or section and 11 insufficient library staff is a leading barrier to increasing services and resources for children and young adults. Survey data is provided in 21 tables and 14 figures. Appendices present survey methodology and data reliability a list of tables with standard errors and survey forms. AEF

This revised edition, an update and expansion of the original volume, offers almost 1,000 entries compared to the 644 entries of the first edition. Included are entries detailing the book trade in individual countries, biographical profiles, quotations about books and librarianship, and representations of book people in fiction and postage stamps. This revised edition also provides much new information on topics such as Latin terminology, job search strategies, and awards and grants. The heart of the volume is an alphabetical listing of countries from around the world. Each entry provides valuable data about the political and economic condition of the country, illiteracy rate, and ratio of library holdings to inhabitants. More specific information is then provided about the number of libraries and their holdings, the number of publishers, and the number of books and newspapers published per year. Libraries of special note are indicated. The rest of the volume contains fascinating information on
