Seurat And The Science Of Painting:

Seurat and the Science of Painting William Innes Homer,1985 **Seurat and the Science of Painting. [Illustr.]** William Innes Homer,1964 **The Science of Art** Martin Kemp,1990 For almost five hundred years the central goal of European painting was the imitation of nature Many artist and theorists believing that imitation must be based on scientific principles found inspiration or guidance in two branches of optics the geometrical science of perspective and the physical science of colour In this pathbreaking and highly illustrated book Martin Kemp examines the major optically orientated examples of artistic theory and practice from the Renaissance to the nineteenth century *Brushstroke and Emergence* James D. Herbert,2015-11-16 No pictorial device in nineteenth century French painting more clearly represented the free ranging self than the loose brushstroke From the romantics through the impressionists and post impressionists the brushstroke bespoke autonomous artistic individuality and freedom from convention Yet the question of how much we can credit to the individual brushstroke is complicated and in *Brushstroke and Emergence* James D Herbert uses that question as a starting point for an extended essay that draws on philosophy of mind the science of emergence and art history Brushstrokes he reminds us are as much creatures of habit and embodied experience as they are of intent When they gather in great numbers they take on a life of their own out of which emerge complexity and meaning Analyzing ten paintings by Courbet Manet C zanne Monet Seurat and Picasso Herbert exposes vital relationships between intention and habit the singular and the complex In doing so he uncovers a space worthy of historical and aesthetic analysis between the brushstroke and the self **The Domain of Images** James Elkins,2018-08-06 In the domain of visual images those of fine art form a tiny minority This original and brilliant book calls upon art historians to look beyond their traditional subjects painting drawing photography and printmaking to the vast array of nonart images including those from science technology commerce medicine music and archaeology Such images James Elkins asserts can be as rich and expressive as any canonical painting Using scores of illustrations as examples he proposes a radically new way of thinking about visual analysis one that relies on an object s own internal sense of organization Elkins begins by demonstrating the arbitrariness of current criteria used by art historians for selecting images for study He urges scholars to adopt instead the far broader criteria of the young field of image studies After analyzing the philosophic underpinnings of this interdisciplinary field he surveys the entire range of images from calligraphy to mathematical graphs and abstract painting Throughout Elkins blends philosophic analysis with historical detail to produce a startling new sense of such basic terms as pictures writing and notation **Critical Readings in Impressionism and Post-Impressionism** Mary Tompkins Lewis,2023-12-22 The essays in this wide ranging beautifully illustrated volume capture the theoretical range and scholarly rigor of recent criticism that has fundamentally transformed the study of French Impressionist and Post Impressionist art Readers are invited to consider the profound issues and penetrating questions that lie beneath this

perennially popular body of work as the contributors examine the art world of late nineteenth century France including detailed looks at Monet Manet Pissarro Degas C zanne Morisot Seurat Van Gogh and Gauguin The authors offer fascinating new perspectives placing the artworks from this period in wider social and historical contexts They explore these painters pictorial and market strategies the critical reception and modern criteria the paintings engendered and the movement s historic role in the formation of an avant garde tradition Their research reflects the wealth of new documents critical approaches and scholarly exhibitions that have fundamentally altered our understanding of Impressionism and Post Impressionism These essays several of which have previously been familiar only to scholars provide instructive models of in depth critical analysis and of the competing art historical methods that have crucially reshaped the field Contributors Carol Armstrong T J Clark Stephen F Eisenman Tamar Garb Nicholas Green Robert L Herbert John House Mary Tompkins Lewis Michel Melot Linda Nochlin Richard Shiff Debora Silverman Paul Tucker Martha Ward

From Point to Pixel Meredith Hoy, 2017-01-03 In this fiercely ambitious study Meredith Anne Hoy seeks to reestablish the very definitions of digital art and aesthetics in art history She begins by problematizing the notion of digital aesthetics tracing the nineteenth and twentieth century movements that sought to break art down into its constituent elements which in many ways predicted and paved the way for our acceptance of digital art Through a series of case studies Hoy questions the separation between analog and digital art and finds that while there may be sensual and experiential differences they fall within the same technological categories She also discusses computational art in which the sole act of creation is the building of a self generating algorithm The medium isn t the message what really matters is the degree to which the viewer can sense a creative hand in the art

Seurat and Science of Paintings William Innes Homer, 1964 **Studien zur Kunst des neunzehnten Jahrhunderts**, 1968 **Worldwide Art Book Syllabus**, 1966 Aufbruch zur Farbe Ina Ewers-Schultz, 1996 The Saturday Review of Politics, Literature, Science and Art, 1910 Bibliographie zur Kunstgeschichte des 19. Jahrhunderts Hilda Lietzmann, 1968 Art Books, 1950-1979 R.R. Bowker Company, 1979 **The Artist's Eyes** Michael Marmor, James Ravin, 2009-10 This title presents a celebration of vision of art and of the relationship between the two Artists see the world in physical terms as we all do However they may be more perceptive than most in interpreting the complexity of how and what they see In this fascinating juxtaposition of science and art history ophthalmologists Michael Marmor and James G Ravin examine the role of vision and eye disease in art They focus on the eye where the process of vision originates and investigate how aspects of vision have inspired and confounded many of the world s most famous artists Why do Georges Seurat s paintings appear to shimmer How come the eyes in certain portraits seem to follow you around the room Are the broad brushstrokes in Monet s Water Lilies due to cataracts Could van Gogh s magnificent yellows be a result of drugs How does eye disease affect the artistic process Or does it at all The Artist s Eyes considers these questions and more It is a testament to the triumph of artistic talent over human vulnerability and a tribute to the paintings that define eras the artists who made them and the eyes
