Seventeenth Century Dutch And Flemish Painting The Thyssen Bornemisza Collection:

Seventeenth-Century Dutch and Flemish Painting Ivan Gaskell, Sammlung Thyssen-Bornemisza, 1990 A catalogue of 128 paintings produced during this period in which the art of portraiture was transformed religious imagery dynamized and new genres such as flower painting were established The art of Holland s Golden Age is perennially popular with collectors and gallery visitors alike and this book provides a new insight into this unique private collection In his introduction Ivan Gaskell considers the extremely varied character of Dutch and Flemish seventeenth century art It ranges from minutely observed scenes of everyday life to portraits religious works and intimate still life compositions The Thyssen Bornemisza Collection is especially rich in landscapes a subject which had emerged as a separate genre in the Netherlands in the previous century The author outlines the development of painting on both sides of the border placing it in its social and historical context and goes on to discuss the taste for Dutch and Flemish art from the seventeenth century to the present day and spotlights some of the earlier collectors This detailed catalogue of 128 paintings is the result of meticulous research in British Dutch and American libraries and archives The entries are arranged in ten groups by subject so that thematic similarities can be conveniently examined Amongst the most celebrated works is Frans Hals s monumental Family Portrait once the most expensive painting in the world All the paintings are illustrated in colour and are accompanied by comparative illustrations and technical photographs

stage where their characters operate very successfully As today the premodern city was the locus where different social groups and classes got together sometimes peacefully sometimes in hostile terms The historical development of the relationship between Christians and Jews for instance was deeply determined by the living conditions within a city By the late Middle Ages nobility and bourgeoisie began to intermingle within the urban space which set the stage for dramatic and far reaching changes in the social and economic make up of society Legal historical aspects also find as much consideration as practical questions concerning water supply and sewer systems Moreover the early modern city within the Ottoman and Middle Eastern world likewise finds consideration Finally as some contributors observe the urban space provided considerable opportunities for women to carve out a niche for themselves in economic terms
