## Seville In Focus:

Juan de Pareja: Afro-Hispanic Painter in the Age of Velázquez David Pullins, Vanessa K. Valdés, 2023-04-03 Diego Velázquez's portrait of Juan de Pareja ca 1608-1670 has long been a landmark of European art but this provocative study focuses on its subject an enslaved man who went on to build his own successful career as an artist This catalogue the first scholarly monograph on Pareja discusses the painter's ties to the Madrid School of the 1660s and revises our understanding of artistic production during Spain's Golden Age with a focus on enslaved artists and artisans The authors illuminate the highly skilled labor within Seville's multiracial society the role of Black saints and confraternities in the promotion of Catholicism among enslaved populations and early twentieth century scholar Arturo Schomburg's project to recover Pareja's legacy The book also includes the first illustrated and annotated list of known works attributed to Pareja **Sevilla in Focus** Juan Agustín Núñez Guarde, 2001-07 **Socio-Spatial Dynamics in Mediterranean Europe** José María Feria-Toribio, Ricardo Iglesias-Pascual, Federico Benassi, 2024-05-21 This book analyses the most recent socio-territorial trends that are developing in the Spanish metropolitan space The first part focuses on the most recent metropolitan dynamics and demographic changes in Southern Europe The second part discusses the most important processes in metropolitan areas the problems of increasing social and residential vulnerability and the problems of diversity management The third part analyses some concrete cases of the main changes and complexity in the spatial dynamics of metropolitan areas in Southern Europe Finally the fourth and last part provides an overview on the instruments and the resources put in place by some Southern European cities for the development of governance and citizen participation as an instrument of reaction to the social economic and COVID crisis By discussing the main changes and uncertainties derived from the social scenarios after the pandemic the dynamics of social dualisation of the city as well as the necessary instruments for its analysis and the main challenges in urban governance with special attention of Southern European context this book provides an interesting read for spatial demographers human geographers social scientists and spatial planners *Enemies Within* María Sierra, 2015-11-25 Can citizenship rights be denied to significant groups in a society that regards itself as civilized and self governing Is it possible to exclude such people in the name of freedom and reason Is it plausible to explain classifications that differentiate between first and second class citizens as natural This is the paradox inherent in modern politics born of the revolutions that ended the Ancien Régime in the western world Throughout the nineteenth century and at the beginning of the twentieth liberalism inspired a representative form of government that appealed to citizenship yet marginalized many social groups including natives women immigrants workers slaves and nomads In the Hispanic dimension of the Atlantic world that this book deals with modern politics was based on exclusions explained as natural and necessary In both Europe and America a distinction was made between the responsible citizen and those others in society potential enemies within who had to be controlled and supervised This book explains the success of this political operation by analysing the historical construction of figures of

alterity that were fundamental to the definition of national civic identities Its basic premise is that imaginaries that were constructed in the nineteenth century can be found even today in western political conceptions The cultural complexity of enduring political images is revealed by exploring the inner workings of virtuous figures in relation to their opposites readers will find the mosaic of representations of civic alterity both recognisable and surprising The contributors to this volume provide historical perspectives on the debate on political legitimacy in open societies Reinventing democracies involves understanding the historicity of inherited formulae of governance and considering them therefore as amenable to improvement The readiness to do this is not a threat to democracy but rather a commitment to looking for it

Books in the Catholic World during the Early Modern Period Natalia Maillard Álvarez, 2013-12-09 The Reformation is often alluded to as Gutenberg's child Could it then be said that the Counter Reformation was his step child The close relationship between the Reformation the printing press and books has received extensive historiographical attention which is clearly justified however the links between books and the Catholic world have often been limited to a tale of censorship and repression The current volume looks beyond this with a series of papers that aim to shed new light on the complex relationships between Catholicism and books during the early modern period before and after the religious schism with special focus on trade common reads and the mechanisms used to control readership in different territories together with the similarities between the Catholic and the Protestant worlds Contributors include Stijn Van Rossem Rafael M P rez Garc a Pedro J Rueda Ram rez Idalia Garc a Aguilar Bianca Lindorfer Natalia Maillard lvarez and Adrien Delmas

*Admiration and Awe* Antonio Urquizar-Herrera, 2017-05-05 This book offers the first systematic analysis of the cultural and religious appropriation of Andalusian architecture by Spanish historians during the sixteenth and seventeenth centuries To date this process of Christian appropriation has generally been discussed as a phenomenon of architectural hybridisation However this was a period in which the construction of a Spanish national identity became a key focus of historical discourse As a result cultural hybridity encountered partial opposition from those seeking to establish cultural and religious homogeneity Spain's Islamic past became a major concern in this period and historical writing served as the site for a complex negotiation of identity Historians and antiquarians used a range of strategies to re appropriate the meaning of medieval Islamic heritage as befitted the new identity of Spain as a Catholic monarchy and empire On the one hand the monuments Islamic origin was subjected to historical revisions and re identified as Roman or Phoenician On the other hand religious forgeries were invented that staked claims for buildings and cities having been founded by Christians prior to the arrival of the Muslims in Spain Islamic stones were used as core evidence in debates that shaped the early development of archaeology and they also became the centre of a historical controversy about the origin of Spain as a nation as well as its ecclesiastical history
