Better Science with Sex and Gender Joy L. Johnson, Lorraine Greaves, Robin Repta, 2007

The Biomedical Sciences in Society Iain Crinson, 2021-03-02 This textbook provides a comprehensive introduction to the interdisciplinary field of the Social Studies of Science and Technology SSST Over the past two decades the biomedical sciences have transformed our understanding of the relationship between the social and natural worlds while its promissory visions are seen to offer extraordinary opportunities for economic and social development But alongside these scientific innovations have emerged new and frequently unanticipated social political bioethical and legal dilemmas and challenges This cutting edge text explores post genomic developments in the field of pharmacogenomics and the prospects for a new precision or personalised medicine the potential of environmental epigenetics to reconfigure the boundaries of the social and natural worlds the emergence of an array of neuro disciplines seeking to identify the neural basis of a whole range of social and economic behaviours and the challenges of constructing a coherent and robust governance framework for the conduct of biomedical science research and innovation responsive to the social and health needs of the whole population

S/He Brain Robert Nadeau, 1996-10-07 During the 1960s Margaret Mead's argument that gender identity is a product of learning in particular cultural contexts was incorporated into the sex gender system in feminist theory In this system sex refers to physiological differences in the body and gender refers to learned sex specific bodies to be viewed as separate and distinct from gender neutral minds In S He Brain Nadeau demonstrates that the sex gender system is not some arcane bit of academic jargon that has no impact on our daily lives It is the greatest source of division and conflict in the politics of our sexual lives for a now obvious reason the brains of men and women are not the same and the differences have behavioral consequences Further he argues that an improved understanding of the relationship between sex and gender could enlarge the bases for meaningful dialogue between men and women and lead to new standards for sexual equality that is more realistic and humane than the current standard The individual most responsible for legitimating the modern distinction between sex and gender was the anthropologist Margaret Mead According to the Mead doctrine gender identity is almost entirely a product of learning in different cultural contexts and sex or biological reality is not a determinant of this identity The assumption that gender identity is learned in sexless or gender neutral minds separate and distinct from sex specific bodies legitimated the sex gender system that has been foundational to feminist theory since the mid 1970s In this system sex refers to physiological differences in the domain of the body and gender to learned behavior in the domain of mind Since this two domain distinction obviated the connection between biological reality and gender identity it allowed gender identity to be viewed as scripted or socially constructed by cultural narratives stories myths legends and the like invented by men to control and oppress women In S He Brain R Nadeau demonstrates that the sex gender system is not in accord with biological reality for now obvious reasons the brains of men and women are not the same and the differences have behavioral

consequences Yet the intent of the book is to serve the cause of full sexual equality and not to escalate the gender war Nadeau attempts to accomplish this by demonstrating that an improved understanding of the relationship between sex and gender can not only enlarge the bases for meaningful communication between men and women It could also serve as the basis for a new and improved standard of sexual equality that eliminates the grossly unfair treatment of women sanctioned by the current standard Sexual science, including manhood, womanhood, and their mutual interrelations Orson Squire Fowler,1870 *Sex on the Brain* Deborah Blum,1997 Investigative science writer Deborah Blum goes beyond the headlines and the growing body of social science literature to the hard science behind new theories of gender specific behavior Drawing on disciplines that include evolutionary science anthropology animal behavior neuroscience psychology and endocrinology she explores matters from the link between immunology and sex to male female adolescent gossip styles and from hormones to emotional connections and breakups *Bodies, Sex and Desire from the Renaissance to the Present* Kate Fisher,Sarah Toulalan,2015-12-11 An examination of how bodies and sexualities have been constructed categorised represented diagnosed experienced and subverted from the fifteenth to the early twenty first century It draws attention to continuities in thinking about bodies and sex concept may have changed but hey nevertheless draw on older ideas and language **Gendered Paths into STEM. Disparities Between Females and Males in STEM Over the Life-Span** Bernhard Ertl,Silke Luttenberger,M. Gail Jones,Rebecca Lazarides,Manuela Paechter,2020-01-31 Feminism & Science Nancy Tuana,1989 thoughtful critiques of the myriad issues between women and science Belles Lettres Outstanding collection of essays that raise the fundamental questions of gender in what we have been taught are objective sciences WATERwheel all of the articles are well written informative and convincing Admirable editorial work makes this anthology unusually helpful for scholars and students Highly recommended Choice Questioning the objectivity of scientific inquiry this volume addresses the scope of gender bias in science The contributors examine the ways in which science is affected by and reinforces sexist biases The essays reveal science to be a cultural institution structured by the political social and economic values of the culture within which it is practiced Sexual Science Orson Squire Fowler,1870 **Sex, Gender, and Kinship** Burton Pasternak,Carol R. Ember,Melvin Ember,1997 Responding to a growing interest in the nature and place of family in society this text looks at gender families family relationships and the role of larger kin groups from a cross cultural perspective It draws upon ethnographic accounts and cross cultural studies to determine and illustrate possible characteristics and outcomes highlight options that occur more or less frequently and where possible to account for choices made The Sociology of Gender Sarah Franklin,1996 The Sociology of Gendercombines 21 classic articles on this important topic with a broad ranging editorial introduction Emphasizing the categorical function of gender as a social technology this volume develops a unique approach to one of the most important areas of late twentieth century sociological thought Combining accessible and specialized contributions to the sociology of gender The Sociology of Genderdemonstrates

the vitality and breadth of gender theory within the social sciences as a whole The book comprises a unique contribution to gender theory in its own right while also providing an up to date and coherent selection of many of the key articles from the past 20 years addressed to sex and gender categories

The Mind Has No Sex? Londa Schiebinger,1991-03-01 In this rich and comprehensive history of women s contributions to the development of early modern science Londa Schiebinger unearths the forgotten heritage of women scientists and probes the cultural and historical forces that continue to shape the course of scientific scholarship and knowledge

Delusions of Gender Cordelia Fine,2005-02-01 THE BRILLIANT AND HUGELY INFLUENTIAL BOOK BY THE WINNER OF THE 2017 ROYAL SOCIETY INSIGHT INVESTMENT SCIENCE BOOKS PRIZE Fun droll yet deeply serious New Scientist A brilliant feminist critic of the neurosciences Read her enjoy and learn Hilary Rose THES A witty and meticulously researched expos of the sloppy studies that pass for scientific evidence in so many of today s bestselling books on sex differences Carol Tavris TLS Gender inequalities are increasingly defended by citing hard wired differences between the male and female brain That s why we re told there are so few women in science so few men in the laundry room different brains are just suited to different things With sparkling wit and humour Cordelia Fine attacks this neurosexism revealing the mind s remarkable plasticity the substantial influence of culture on identity and the malleability of what we consider to be hardwired difference This modern classic shows the surprising extent to which boys and girls men and women are made not born
