Betsky,1995 Buildings have always been an expression of human sexuality In this book architecture critic and curator Aaron Betsky takes a look at the man made world and concludes that it is just that made by men and not women The structure of buildings and the layout of cities in the modern world have almost always been determined by men and the abstract and alien order of grids and columns that has resulted imprisons us in a way of living based on repression and in some cases oppression By contrast it is women who create the interior spaces within these man created environments Comfortable beautiful seductive and logical these interiors act as areas of escape self definition and sometimes even revelation Drawing on a wide range of architectural examples from African mud huts to modern apartment complexes Betsky explores what effects this division of architectural labor has had on our sensibilities and indeed on how we relate to one another as men and women He believes that although it has always been thus we do not have to live within this dichotomy between the exterior and the interior the made and the lived the masculine and the feminine forever It is possible says Betsky to create spaces of liberation spaces in which we can re construct our selves and our world **Annual Plant Reviews, Flowering and its**

Manipulation Charles Ainsworth,2008-04-15 The flowering plants now dominate the terrestrial ecosystems of the planet and there are good reasons for supposing that the flower itself has been a major contributing factor to the spread of the Angiosperms The flowers of higher plants not only contain the organs of plant reproduction but are of fundamental importance in giving rise to fruits and seeds which constitute a major component of the human diet This volume opens with a

chapter describing a model for the evolution of the Angiosperm flower Chapters 2 to 5 describe the core development of the flower and include floral induction floral patterning and organ initiation floral shape and size and inflorescence architecture Chapters 6 to 8 focus on more specialised aspects of floral development monoecy cytoplasmic male sterility and flowering in perennials Chapters 9 and 10 address more functional aspects flower colour and scent The book concludes appropriately with a chapter on flower senescence Applied aspects are stressed wherever appropriate and the book is directed at researchers and professionals in plant genetics developmental and molecular biology The volume has been designed to complement an earlier volume in our Annual Plant Reviews series O'Neill S D and Roberts J A 2002 Plant Reproduction

Design and Feminism Joan Rothschild, Alethea Cheng, 1999 How well do our designed environments the places and spaces where we live work and play meet our aesthetic and functional needs Increasingly the distinction between the spaces considered public and private or work and home is becoming more blurred As a result innovative designs are needed to meet the challenges of our ever changing environment Our streets parks dwellings and tools are designed to a one size fits all standard and the responses of the design community to meet diverse needs have been mixed at best Design and Feminism offers feminist critiques of these inadequate design standards and suggest ideas projects and programs for change The interdisciplinary essays reflect the writers diverse fields architecture planning industrial and graphic design and architectural urban and design history Essays cover such subject as rethinking the American city graphic design and the urban landscape working at home theories of women and design and a trio of essays on industrial designs A review essay of the literature in these fields the first of its kind rounds out the collection Contributors are Amelia Amon Wendy E Brawer Cheryl Buckley Sue Cavanagh Alethea Cheng Roberta M Feldman Etain Fitzpatrick Alice T Friedman Dolores Hayden Ghislaine Hermanuz Barbara Knecht Ellen Lupton Maggie Mahboubian Francine Monaco Nancy Perkins Victoria Rosner Joan Rothschild Susana Torre Lynne Walker and Leslie Kanes Weismann

Introduction to Bioinformatics with R Edward Curry, 2020-11-02 In biological research the amount of data available to researchers has increased so much over recent years it is becoming increasingly difficult to understand the current state of the art without some experience and understanding of data analytics and bioinformatics An Introduction to Bioinformatics with R A Practical Guide for Biologists leads the reader through the basics of computational analysis of data encountered in modern biological research With no previous experience with statistics or programming required readers will develop the ability to plan suitable analyses of biological datasets and to use the R programming environment to perform these analyses This is achieved through a series of case studies using R to answer research questions using molecular biology datasets Broadly applicable statistical methods are explained including linear and rank based correlation distance metrics and hierarchical clustering hypothesis testing using linear regression proportional hazards regression for survival data and principal component analysis These methods are then applied as appropriate throughout the case studies illustrating how they can be used to answer research questions Key Features Provides a practical

course in computational data analysis suitable for students or researchers with no previous exposure to computer programming Describes in detail the theoretical basis for statistical analysis techniques used throughout the textbook from basic principles Presents walk throughs of data analysis tasks using R and example datasets All R commands are presented and explained in order to enable the reader to carry out these tasks themselves Uses outputs from a large range of molecular biology platforms including DNA methylation and genotyping microarrays RNA seq genome sequencing ChIP seq and bisulphite sequencing and high throughput phenotypic screens Gives worked out examples geared towards problems encountered in cancer research which can also be applied across many areas of molecular biology and medical research This book has been developed over years of training biological scientists and clinicians to analyse the large datasets available in their cancer research projects It is appropriate for use as a textbook or as a practical book for biological scientists looking to gain bioinformatics skills

Spiritual Geometry & Imagery Charles W. Allen, 2015-10-23 Tens of thousands of books on religion and spirituality are continually being written every year and it is difficult to find something really new and refreshing as this book The author has truly assembled an amazing and beautiful work of colorful graphic art and unique simplistic imagery All this is designed to depict Christian spiritual concepts values and Christian thinking for those seeking to better understand mankinds relationship with God and present their faith to others This book consists of 276 color pages with over 70 pages of compelling imagery Twelve thematic sections are presented which can be read in any order and all having an associated synopsis to guide you through the images and ideas presented It is written in a style that is creative introspective at times analytical instructive and humorous but every page points to God There is no pretense by the author to be a highly knowledgeable or anointed theologian Hes just a man of God with a special message to convey with enough stunning information to encourage all readers to want to know more about God or use these images as a jump off point for their own purposes Featured Images found here www.spiritualimageryimpact.com
