**Children: A Guide for Adults** Andy Phippen, Sandra Leaton Gray, 2021-10-15 The digital world is a place where even the most informed parents and teachers can feel one pace behind children Bombarded with scare stories about the risks of everyday Internet interactions for young people those caring for them are frequently left to navigate online minefields more or less on their own This book is here to help Two leading experts on digital childhoods Dr Sandra Leaton Gray and Professor Andy Phippen explore the realities of growing up online in the 21st century They provide an informative and accessible guide to the issues young people face today based on the latest research and scholarship They also expose the many ways the child safeguarding industry means well but often gets things very wrong The authors explain the latest research on topics such as biometrics encryption cyphertext and sexting and analyse their relevance to the next generation They raise a number of key questions about the contemporary lives of young people including their relationship with digital technologies such as games social media surveillance and tracking devices They also challenge conventional thinking on these issues Rather than relying on technology they argue we should instead focus on the quality of relationships between children their peers their parents and with adults generally Then we can build a healthy digital future for society as a whole **Four Battlegrounds** Paul

Scharre, 2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club's Must Read Books An invaluable primer to arguably the most important driver of change for our future P W Singer author of Burn In An award winning defense expert tells the story of today's great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI superpowers China the United States and

Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing technology and dominate the future Four Battlegrounds argues that four key elements define this struggle data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined Advanced computer chips are the essence of computing power control over chip supply chains grants leverage over rivals Talent is about people which country attracts the best researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military Scharre s account surges with futuristic technology He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits China s National Team of leading AI companies to show the chilling synergy between China s government private sector and surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology Engaging and direct Four Battlegrounds offers a vivid picture of how AI is transforming warfare global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order
