Risks and Challenges of Hazardous Waste Management: Reviews and Case Studies Gabriella Marfe, Carla Di Stefano, 2020-10-21 This reference presents reviews and case studies of hazardous waste management in a selection of cities. The overarching themes of the compiled topics include 1 the problems of healthcare waste management 2 case studies of hazardous waste mismanagement 3 health risks associated with environmental waste issues in environmental health and 4 grassroots environmentalism. The volume initially presents reviews and case studies from developing countries including countries in South America Argentina Africa Algeria and Nigeria and Asia India. The latter chapters of the book focus on environmental issues in Campania a region in Italy. These chapters also provide an insight into the impact of the COVID 19 pandemic on waste management practices in this region. Risks and Challenges of Hazardous Waste Management is an insightful reference for management trainees professionals and researchers associated with waste management and environmental health firms. Readers will gain insights into current issues and practices in the respective industries. The reviews and case studies presented in the reference are also useful to professionals involved in risk assessment studies.

**Challenges and Opportunities of Distributed Renewable Power** Sudipta De, Avinash Kumar Agarwal, Pankaj Kalita, 2024-04-29 Due to limited non renewable resources and climate change problems the global energy sector must be transformed from fossil fuel dominated to renewable energy based. However due to constraints of resources technology locked capital in existing energy systems limited financial support and associated risks in investment etc this transformation is not expected to occur rapidly. Rather there should be an energy transition path with planned replacement of fossil fuel based systems to renewable based ones. Large scale renewable power is yet to be dominant globally. Distributed renewable power is appearing to be more common as its implementation requires smaller investments with lesser

financial risks There are several options of such distributed renewable power with great prospects at different locations Simultaneously there are many challenges to overcome for successful implementation of such projects These challenges are also multi dimensional In this book several chapters address bright prospects of several options of distributed renewable power Simultaneously other chapters address challenges of implementation of such technologies The chapters together cover a wide perspective of both prospects and associated challenges to be addressed for it Chapters include technological issues optimization of energy systems logistics and policies case studies etc Researchers industry professionals and students can benefit from this book

**Global Energy Transition and Sustainable Development Challenges, Vol. 1** Tessaleno Devezas, João Leitão, Askar Sarygulov, David J. LePoire, Bulat Khusainov, 2024-12-17 This two volume book presents the challenges of the global energy transition offering a comprehensive exploration of the policies and drivers shaping the pace and trajectory of this transformation Highlighting regional development the book shows how different models and scenarios of energy transition emerge It discusses important factors such as materials and technologies shedding light on the opportunities and constraints for the energy transition Global warming and climate change influenced the change in people s consciousness and their awareness of the need for more limited use of hydrocarbon resources Changes in weather conditions rising sea levels and destructive climate events such as hurricanes forest fires droughts floods etc have become more frequent Many countries around the world reacting to these changes have developed long term plans to actively replace fossil fuels gas oil and coal with renewable energy sources mainly solar and wind However the low replacement rates observed in the global energy

sector over the past 30 years raise the question of how far the decarbonization scenarios and models being implemented by many countries bring us closer to the ultimate goal of creating an economy with a low carbon footprint Seeking answers the volumes feature 22 chapters split across the two books which in detail discuss various aspects of the energy transition and their impact on the sustainability of economic development and the future of energy This first volume Models and Regions focuses on regional disparities and economic drivers presenting case studies from different regions in 10 chapters
