VIJAYALAKSHMI PAI, 2017-05-01 The second edition of this book provides a comprehensive introduction to a consortium of technologies underlying soft computing an evolving branch of computational intelligence which in recent years has turned synonymous to it The constituent technologies discussed comprise neural network NN fuzzy system FS evolutionary algorithm EA and a number of hybrid

systems which include classes such as neuro fuzzy evolutionary fuzzy and neuro evolutionary systems The hybridization of the technologies is demonstrated on architectures such as fuzzy backpropagation network NN FS hybrid genetic algorithm based backpropagation network NN EA hybrid simplified fuzzy ARTMAP NN FS hybrid fuzzy associative memory NN FS hybrid fuzzy logic controlled genetic algorithm EA FS hybrid and evolutionary extreme learning machine NN EA hybrid Every architecture has been discussed in detail through illustrative examples and applications The algorithms have been presented in pseudo code with a step by step illustration of the same in problems The applications demonstrative of the potential of the architectures have been chosen from diverse disciplines of science and engineering This book with a wealth of information that is clearly presented and illustrated by many examples and applications is designed for use as a text for the courses in soft computing at both the senior undergraduate and first year postgraduate levels of computer science and engineering It should also be of interest to researchers and technologists desirous of applying soft computing technologies to their respective fields of work

Local-Neutrosophic Logic and Local-Neutrosophic Sets: Incorporating Locality with Applications

Takaaki Fujita, Florentin Smarandache, 2025-01-01 The study of uncertainty has been a significant area of research with concepts such as fuzzy sets 87 fuzzy graphs 51 and neutrosophic sets 58 receiving extensive attention In Neutrosophic Logic indeterminacy often arises from real world complexities This paper explores the concept of locality as a key factor in determining indeterminacy building upon the framework introduced by F Smarandache in 73 Locality refers to processes constrained within a specific region where an object or system is directly influenced by its immediate surroundings In contrast nonlocality involves effects that transcend spatial or temporal boundaries where changes in one location have direct implications for another This paper introduces the concepts of Local Neutrosophic Logic and Local Neutrosophic Set by integrating the notion of locality into Neutrosophic Logic It provides their mathematical definitions and examines potential applications

Set Theory for the Working Mathematician Krzysztof Ciesielski, 1997-08-28 This text presents methods of modern set theory as tools that can be usefully applied to other areas of mathematics The author describes numerous applications in abstract geometry and real analysis and in some cases in topology and algebra The book begins with a tour of the basics of

set theory culminating in a proof of Zorn's Lemma and a discussion of some of its applications. The author then develops the notions of transfinite induction and descriptive set theory with applications to the theory of real functions. The final part of the book presents the tools of modern set theory: Martin's Axiom, the Diamond Principle, and elements of forcing. Written primarily as a text for beginning graduate or advanced level undergraduate students, this book should also interest researchers wanting to learn more about set theoretical techniques applicable to their fields. Soft Sets Sunil Jacob John, 2020-10-01. This book offers a self-contained guide to the theory and main applications of soft sets. It introduces readers to the basic concepts, the algebraic and topological structures, as well as hybrid structures such as fuzzy soft sets and intuitionistic fuzzy sets. The last part of the book explores a range of interesting applications in the fields of decision making, pattern recognition, and data science. All in all, the book provides graduate students and researchers in mathematics and various applied science fields with a comprehensive and timely reference guide to soft sets. **Certain Single-Valued Neutrosophic Graphs with Application** Muhammad Akram, Saba Siddique, In this research paper, we present certain types of single-valued neutrosophic graphs including edge regular single-valued neutrosophic graphs and totally edge regular single-valued neutrosophic graphs. We investigate some of their related properties. We describe an application of single-valued neutrosophic graph in decision making process and present the procedure of our method that is used in our application in an algorithm. Novel Neutrosophic Cubic Graphs Structures with Application in Decision Making Problems Muhammad Gulistan, Mumtaz Ali, Muhammad Azhar, Seungmin Raho, Seifedine Kadry, Graphs allow us to study the different patterns of inside the data by making a mental image. The aim of this paper is to develop neutrosophic cubic graph structure which is the extension of neutrosophic cubic graphs. As neutrosophic cubic graphs are defined for one set of edges between vertices while neutrosophic cubic graphs structures are defined for more than one set of edges. Further, we defined some basic operations such as Cartesian product, composition, union, join, cross product, strong product, and lexicographic product of two neutrosophic cubic graph structures. Several types of other interesting properties of neutrosophic cubic graph structures are discussed in this paper. Finally, a decision making algorithm based on the idea of neutrosophic cubic graph structures is constructed. The proposed decision making algorithm is applied in a decision making problem to check the validity. Fuzzy Sets, Fuzzy Logic, Fuzzy Methods with Applications Hans Bandemer, Siegfried Gottwald, 1995. This highly accessible introduction to the fundamentals of fuzzy sets and their applications covers fuzzy numbers, fuzzy programming, fuzzy controllers, qualitative fuzzy data analysis, and much more. **Discrete Mathematical Structures with Applications to Computer Science** Jean-Paul Tremblay, R. Manohar, 1987. *Monographic Series* Library of Congress, *Multisensor, Multisource Information Fusion--architectures, Algorithms, and Applications ...*, 2004. Kybernetika, 1992.
