Fifty Key Writers on Photography Mark Durden, 2013-02-15 A clear and concise survey of some of the most significant writers on photography who have played a major part in defining and influencing our understanding of the medium. It provides a succinct overview of writing on photography from a diverse range of disciplines and perspectives and examines the shifting perception of the medium over the course of its 170 year history. Key writers discussed include Roland Barthes, Susan Sontag, Jacques Derrida, Henri Cartier-Bresson, Geoffrey Batchen. Fully cross referenced and in an A-Z format, this is an accessible and engaging introductory guide.

Photography and Ontology Donna West Brett, Natalya Lusty, 2018-09-03 This edited collection explores the complex ways in which photography is used and interpreted as a record of evidence, as a form of communication, as a means of social and political provocation, as a mode of surveillance, as a narrative of the self, and as an art form. What makes photographic images unsettling, and how do the re-uses and interpretations of photographic images unsettle the self-evident reality of the visual field? Taking up these themes, this book examines the role of photography as a revelatory medium, underscored by its complex association with history, memory, experience, and identity.

Photography and Doubt Sabine T. Kriebel, Andrés Mario Zervigón, 2016-11-25 Recent decades have seen photography's privileged relationship to the real come under question. Spurred by the postmodern critique of photography in the 1980s and the rise of digital technologies soon thereafter, scholars have been asking who and what built this understanding of the medium in the first place. *Photography and Doubt* reflects on this interest in photography's referential power by discussing it in rigorously historical terms. How was the understanding of photographic realism cultivated in the first place? What do cases of staged and manipulated photography reveal about that realism's hold on audiences across the medium's history? Have doubts about photography's testimonial power stimulated as much knowledge as its realism? Edited by Sabine T. Kriebel and Andrés Mario Zervigón, *Photography and Doubt* is the first multi-authored collection specifically designed to explore these questions. Its 13 original essays, illustrated with 73 color images, explore cases when the link between the photographic image and its referent was placed under stress and when photography was as attuned to its myth-making capabilities as to its claims to authenticity. *Photography and Doubt* will serve as a valuable resource for students and scholars in art history, visual and media studies, philosophy, and the history of science and technology.

Japanese Photobooks of the 1960s and '70s 日本写真, Ivan Vartanian, Lesley A. Martin, 2009 During the 1960s and 70s in Japan, the photobook, through a combination of excellence in design, printing, and materials, overtook prints as a popular mode of artistic dissemination. This process has expanded to an extent where any discussion of Japanese photography now has to include the book work. Today, the most famous works, such as Nobuyoshi Araki's *Sentimental Journey* and Eikoh Hosoe's *Man and Woman*, continue to inspire artists internationally. *Japanese Photobooks of the 1960s and 70s* presents forty definitive publications from the era, piecing together an otherwise invisible history that has played out in

tandem with photography as a medium Included are some of the most influential works along with forgotten gems placed within a larger historical and sociological context Each book beautifully reproduced through numerous spreads is accompanied by an in depth explanatory text and sidebars highlighting important editors designers themes and periodicals Lavishly produced this unique publication is an ode to the distinct character and influence of the Japanese photobook

 an island nation isolated until the mid nineteenth century opened its doors to foreign photographers in the 1860s These
 photographers presented a visual cultural kaleidoscope of Japanese life to an eager outside world The 160 photographs in
 this volume are curated from tourist albums and presented in the typical sequence The modern reader will experience Meiji
 Japan in the way of a nineteenth century armchair traveler While photographers in other countries were marketing sepia
 toned prints photographers in Japan took advantage of local artists and had their prints exquisitely painted As with all hand
 rendered artworks quality varied many photographs were executed so well as to challenge modern color photography
 Photographers were limited by government restrictions and many scenes were set in studios rather than in real life Despite
 the limitations tourists visiting the country could purchase albums filled with colorful renditions of Japan s peoples and
 places The carefully staged and approved photographs promoted an idealized and romanticized vision of Meiji Japan
 Modernization and industrialization changed the country dramatically and the last vestiges of the disappearing feudal culture
 are captured by the camera These intriguing photographs are beautiful multi media artworks representing a vanished world
