Seven Clans Of The Cherokee Society:

Seven Clans of the Cherokee Society Marcelina Reed, 1993 Describes how the seven clan contributed to make the Cherokee distinctive from the many other Native American tribes *New Men* Thomas A. Foster, 2011-01-24 In 1782 J Hector St John de Cr vecoeur wrote What then is the American this new man He is an American who leaving behind him all his ancient prejudices and manners receives new ones from the new mode of life he has embraced In casting aside their European mores these pioneers de Cr vecoeur implied were the very embodiment of a new culture society economy and political system But to what extent did manliness shape early America s character and institutions And what roles did race ethnicity and class play in forming masculinity Thomas A Foster and his contributors grapple with these questions in *New Men* showcasing how colonial and Revolutionary conditions gave rise to new standards of British American manliness Focusing on Indian African and European masculinities in British America from earliest Jamestown through the Revolutionary era and addressing such topics that range from slavery to philanthropy and from satire to warfare the essays in this anthology collectively demonstrate how the economic political social cultural and religious conditions of early America shaped and were shaped by ideals of masculinity Contributors Susan Abram Tyler Boulware Kathleen Brown Trevor Burnard Toby L Ditz Carolyn Eastman Benjamin Irvin Janet Moore Lindman John Gilbert McCurdy Mary Beth Norton Ann Marie Plane Jessica Choppin Roney and Natalie A Zacek **Social Order and Political Change** Duane Champagne, 1992-07-01 Under what conditions can democratic governments be formed and become stable The author addresses this question in a unique way that brings sociological and political theory to bear on the study of traditional societies long the preserve of historians and anthropologists By examining in detail the history of four American Indian societies the Cherokee the Choctaw the Chickasaw and the Creek the author documents a general theory of politics and constitutional government The four societies present an opportunity to study the process of democratic institution building in a controlled comparative historical context The societies were subject to similar geopolitical relations with the United States they were incorporated into the same sequence of world economic system relations initially fur trade and then the cotton market they experienced the emergence of class structures and they all produced some form of constitutional democracy The Cherokee however adopted a stable constitutional government earlier and with less coercion than the other three nations Why was this so With the aid of comparative analysis the author finds the answer in the Cherokee differentiation of politics from the nationally and religiously ordered clan system This set of institutional relations allowed the Cherokee to maintain a strong sense of social solidarity while tolerating conflict increased political differentiation and formation of a political nationality The other three societies were either less differentiated or less socially unified They formed their constitutional governments thirty to forty years later than the Cherokee and with more internal political coercion and in the Creek case with less political stability The formation and stabilization of democratic state governments is a major issue in such contemporary phenomena as political

change in Third World nations and the transformation of the governments of Eastern Europe The four case studies presented in this book form the basis of a new and powerful theoretical argument for understanding historical patterns of democratic change political stability and the relations of political power **Journal of Cherokee Studies** ,1992 *The Cherokee* Catherine M.
