Seven Years Old In The Home Environment:

Seven Years Old in the Home Environment John Newson, Elizabeth Newson, 2017-12-12 John and Elizabeth Newson's long term investigation of child up bringing attracted intense interest from its earliest beginnings pathbreaking and seminal were adjectives that greeted their first report The study is now established as one of the major projects of the seventies This third volume of the series catches some seven hundred Nottingham children at a critical stage of their development in transition from infant to junior school they are moving out of the protective family orbit and into the wider social world of street playground and classroom where cultural pressures make themselves felt in ever more demanding ways Like the Newson's earlier books this study has a strong ecological flavour in the sense that what children do what parents do and how they feel about what they do are all set firmly into the broader context of life as it is lived in contemporary urban society This is no laboratory investigation Yet a sensitive and subtle methodology has allowed the Newsons to present an impressive structure of hard factual data while putting flesh on the statistical bones by constant reference to the mothers own thoughts and reactions faithfully recorded in their own vivid words The result is a rich descriptive picture of seven year olds and their family life their play friendships quarrels their duties and privileges their fears fantasies and jokes Inevitably much of the book explores the dynamics of conflict between mother and child and takes a long hard look at the domestic power game as it is expressed in both words and punishment At the same time the loving and caring side of the relationship is closely and delicately examined with a rare empathy for both parent and child In short this is a study in depth and in breadth of how parents and children bring each other up Teachers doctors nurses and social workers as well as parents welcomed the Newsons earlier reports Once again no professional worker in the field of childhood or parenthood can afford to be without the insights offered by this volume which is also a rich source of enjoyment for any observer professional or amateur of the family in society today Today it can be enjoyed in its historical context

The Health Consequences of Involuntary Exposure to Tobacco Smoke, 2006 This Surgeon General's report returns to the topic of the health effects of involuntary exposure to tobacco smoke The last comprehensive review of this evidence by the Department of Health and Human Services DHHS was in the 1986 Surgeon General's report The Health Consequences of Involuntary Smoking published 20 years ago this year This new report updates the evidence of the harmful effects of involuntary exposure to tobacco smoke This large body of research findings is captured in an accompanying dynamic database that profiles key epidemiologic findings and allows the evidence on health effects of exposure to tobacco smoke to be synthesized and updated following the format of the 2004 report The Health Consequences of Smoking The database enables users to explore the data and studies supporting the conclusions in the report The database is available on the Web site of the Centers for Disease Control and Prevention CDC at <http://www.cdc.gov/tobacco>

Annual Progress in Child Psychiatry and Child Development, 1991 Stella Chess, Margaret E. Hertzog, 1991-12 The twenty fourth volume of this acclaimed series presents 30 articles in seven major

areas developmental studies stress and vulnerability language studies temperament studies clinical syndromes diagnosis and treatment and psychosocial issues The articles are of two types original work that holds promise of furthering progress in the study of the child and review pieces that offer an insightful systematic perspective on a significant area Each article appears in its entirety with all original tables figures and bibliographies

Lost Freedom Mathew Thomson, 2013-11 Lost Freedom addresses the widespread feeling that there has been a fundamental change in the social life of children in recent decades the loss of childhood freedom and in particular the loss of freedom to roam beyond the safety of home Mathew Thomson explores this phenomenon concentrating on the period from the Second World War until the 1970s and considering the roles of psychological theory traffic safety consciousness anxiety about sexual danger and television in the erosion of freedom Thomson argues that the Second World War has an important place in this story with war borne anxieties encouraging an emphasis on the central importance of a landscape of home War also encouraged the development of specially designed spaces for the cultivation of the child including the adventure playground and the virtual landscape of children's television However before the 1970s British children still had much more physical freedom than they do today Lost Freedom explores why this situation has changed The volume pays particular attention to the 1970s as a period of transition and one which saw radical visions of child liberation but with anxieties about child protection also escalating in response This is strikingly demonstrated in the story of how the paedophile emerged as a figure of major public concern Thomson argues that this crisis of concern over child freedom is indicative of some of the broader problems of the social settlements that had been forged out of the Second World War
