Several Deaths Later:

Several Deaths Later Ed Gorman, 2016-09-17 The popular game show *Celebrity Circle* is something of a graveyard for show biz mediocrities so Tobin the five foot five movie critic with the fiery hair and the equally fiery temper is less than thrilled to accept a guest stint as the show films a week's worth of broadcasts aboard an ocean liner But Tobin's career has hit the skids since he solved his TV partner's murder *Murder on the Aisle* money is money and besides he gets a free cruise in the bargain But someone on board has more in mind than fabulous prizes and Ken Norris the smarmy emcee of *Celebrity Circle* turns up with a knife in his back The Captain blames Cindy McBain the young secretary from Kansas City in whose room the victim's body was discovered Although Tobin finds her wearing nothing but a robe covered in Norris blood he thinks she is innocent if less than pure and he swears his belief has nothing to do with her incredible body or her enthusiastically expressed affection for celebrities

Environment, Society and the Black Death

Per Lagerås, 2016-01-30 In the mid fourteenth century the Black Death ravaged Europe leading to dramatic population drop and social upheavals Recurring plague outbreaks together with social factors pushed Europe into a deep crisis that lasted for more than a century The plague and the crisis and in particular their short term and long term consequences for society have been the matter of continuous debate Most of the research so far has been based on the study of written sources and the dominating perspective has been the one of economic history A different approach is presented here by using evidence and techniques from archaeology and the natural sciences Special focus is on environmental and social changes in the wake of the Black Death Pollen and tree ring data are used to gain new insights into farm abandonment and agricultural change and to point to the important environmental and ecological consequences of the crisis The archaeological record shows that the crisis was not only characterized by abandonment and decline but also how families and households survived by swiftly developing new strategies during these uncertain times Finally stature and isotope studies are applied to human skeletons from medieval churchyards to reveal changes in health and living conditions during the crisis The conclusions are put in wider perspective that highlights the close relationship between society and the environment and the historical importance of past epidemics
