**Das Mysterium der Tiere** Man-Made Women Kathleen Richardson, Charlotta Odlind, 2023-01-01 This book presents a unique feminist approach to sex dolls and sex robots, taking a critical look at the academic and business narratives that serve to rationalise them. As new forms of pornography, porn robots, this edited volume provides an urgent, women's centred critique. The emergence of sex robots is situated within the wider context of the attack on women's rights and the relentless rise of techno pornography. As an outgrowth of the industries of prostitution, pornography and child sex abuse, these objects offer new ways to dehumanise women and girls. While support for sex robots is positioned as progressive and emancipatory, the contributors in this volume argue they reduce women to consumable parts. They explore how law, the arts, ethics, economy, politics and culture are interconnected with harmful technological developments.

**Artificial Women** Julie Wosk, 2024-04-02 Enhanced by artificial intelligence, today's simulated females are becoming ever more lifelike as the virtual vies with the real. They have already had a dramatic impact on personal relationships, on our views of women and our ideas about what it means to be human. From sex dolls to Siri, talking Barbies to robotic mothers, Artificial Women explores the ways in which today's simulated females, both real and fictional, reflect and expose our own ideas about sexuality, gender and the impact of simulations on social relationships. Join Julie Wosk as she probes the realm of compliant robot sex workers, nurturing, genial caregivers and companions, virtual assistants like Siri and Alexa, and rebellious creations in film, television, literature, art, photography and current developments in robotics. These simulated women often reflect old stereotypes but also highlight a new breed of female robots, cyborgs and dolls that possess agency, self-awareness and autonomy. Artificial Women pushes the boundaries of culture studies to consider how new digital technologies, artificial intelligences and burgeoning simulations affect our own understandings of ourselves.

Do Androids Sleep with Electric Sheep? Johannes Grenzfurthner, 2009 As the official artists' collective representing Vienna at the São Paulo Art Biennial in 2002, the monochrom group Johannes Grenzfurthner, Günther Friesinger and Daniel Fabry invented an artist called Georg Paul Thomann and carried off the exhibition as a very elaborate prank. The trio, aided by philosopher Thomas Ballhausen, brings that same sense of the cutting edge and the carnivalesque to this collection exploring erotica, science

fiction and technology A bracing mix of literary forms the book shows why the fantasy genre is especially suited to the investigation of the transgressive realms of sexuality and pornography Here questions of science research and technologization are examined along with the complex surrounding urbanism artificiality and control or the loss of control Provocative and penetrating Do Androids Sleep with Electric Sheep reveals a wealth of depictions of the future and shows the many ways in which they also address the present **Report of the Commissioner of Education** ,1899 Annual Report of the Commissioner of Education United States.
