Insane Consequences DJ Jaffe, 2017-04-11 This well researched and highly critical examination of the state of our mental health system by the industry's most relentless critic presents a new and controversial explanation as to why in spite of spending 147 billion annually 140 000 seriously mentally ill are homeless 390 000 are incarcerated and even educated tenacious and caring people can't get treatment for their mentally ill loved ones DJ Jaffe blames the mental health industry and the government for shunning the 10

million adults who are the most seriously mentally ill mainly those who suffer from schizophrenia and severe bipolar disorder and instead working to improve mental wellness in 43 million others many of whom are barely symptomatic Using industry and government documents scientific journals and anecdotes from his thirty years of advocacy Jaffe documents the insane consequences of these industry driven policies psychiatric hospitals for the seriously ill are still being closed involuntary commitment criteria are being narrowed to the point where laws now require violence rather than prevent it the public is endangered and the mentally ill and their families are forced to suffer Insane Consequences proposes smart compassionate affordable and sweeping reforms designed to send the most seriously ill to the head of the line for services rather than to jails shelters prisons and morgues It lays out a road map to spend less on mental health and more on mental illness replace mission creep with mission control and return the mental health system to a focus on the most seriously ill It is not money that is lacking it s leadership This book is a must read for anyone who works in the mental health industry or cares about the mentally ill violence homelessness incarceration or public policy

Building a Technology Inclusive Agency James H. Edwards,2009 The development of low cost and practical information and communication technologies ict has led to increased pressure on social workers and other human service providers to insure their clients are not digitally disenfranchised In fact the National Association of Social Workers nasw and Association of Social Work Boards aswb Standards for Technology and Social Work

Practice require social work practitioners to insure their own access to technology as well as insuring access to technology on behalf of their clients The first step in carrying out this mandate is to understand how why and for what purpose clients use ict Secondly we must understand the role that human service agencies can play in insuring their clients are not digitally disenfranchised To this end the qualitative study presented here is comprised of two components first an exploratory study examining how women in recovery from chemical addiction view use and envision their use of technology and second an evaluative component examining an effort by their provider agency to promote digital empowerment through the use of computer access and training The findings suggest the participants were empowered through increased access to technology and increased computer skills The agency struggled to maintain an adequate technology infrastructure for the participants but found the intervention to be beneficial and consistent with its overall mission of empowerment In general the participants expressed an increased frequency of computer use outside of the training as well as increased confidence in their ability to use a computer The participants expressed feelings of joy excitement pride and an overall sense of empowerment as a result of the computer training experience This was evident by the perfect attendance at the trainings and confirmed in the statements by the executive director The dissertation citations contained here are published with the permission of ProQuest llc Further reproduction is prohibited without permission Copies of dissertations may be obtained by Telephone 800 1 800 521 0600 Web page http://www.proquest.com/en_US/products/dissertations/individuals.shtml *Appletons' Journal* ,1878
