[Androids, Cyborgs, and Robots in Contemporary Culture and Society](#) Thompson, Steven John, 2017-09-13 Mankind's dependence on artificial intelligence and robotics is increasing rapidly as technology becomes more advanced. Finding a way to seamlessly intertwine these two worlds will help boost productivity in society and aid in a variety of ways in modern civilization. [Androids, Cyborgs, and Robots in Contemporary Culture and Society](#) is an essential scholarly resource that delves into the current issues, methodologies, and trends relating to advanced robotic technology in the modern world. Featuring relevant topics that include STEM technologies, brain-controlled androids, biped robots, and media perception, this publication is ideal for engineers, academicians, students, and researchers that would like to stay current with the latest developments in the world of evolving robotics. *God and the Book of Nature* Mark Harris, 2023-12-19 *God and the Book of Nature* develops theological views of the natural sciences in light of the recent theological turn in science and religion scholarship and the science engaged theology movement. Centered around the Book of Nature metaphor, it brings together contributions by theologians, natural scientists, and philosophers based in Europe and North America. They provide an exploration of complementary and even contesting readings of the Book of Nature, particularly in light of the vexing questions that arise around essentialism and unity in the field of science and religion. Taking an experimental and open-ended approach, the volume does not attempt to unify the readings into a single plot that defines the Book of Nature, still less a single theology of nature, but instead it represents a variety of hermeneutical stances. Overall, the book embraces a constructive theological attitude toward the modern sciences and makes significant contributions to the research literature in science and religion. *The Environmental Moment* David Stradling, 2012-03-28 *The Environmental Moment* is a collection of documents that reveal the significance of the years 1968-1972 to the environmental movement in the United States. With material ranging from short pieces from the Whole Earth Catalog and articles from the Village Voice to lectures, posters, and government documents, the collection describes the period through the perspective of a diversity of participants, including activists, politicians, scientists, and average citizens. Included are the words of Rachel Carson but also the National Review, Howard Zahniser on wilderness, Nathan Hare on the Black underclass. The chronological arrangement reveals the coincidence of a multitude of issues that rushed into public consciousness during a critical time in American history. **Camp TV** Quinlan Miller, 2019-04-04 Sitcoms of the 1950s and 1960s are widely considered conformist in their depictions of gender roles and sexual attitudes. In *Camp TV*

Quinlan Miller offers a new account of the history of American television that explains what campy meant in practical sitcom terms in shows as iconic as *The Dick Van Dyke Show* as well as in more obscure fare such as *The Ugliest Girl in Town*. Situating his analysis within the era's shifts in the television industry and the coalescence of straightness and whiteness that came with the decline of vaudevillian camp, Miller shows how the sitcoms of this era overflowed with important queer representation and gender nonconformity. Whether through regular supporting performances (Ann B. Davis's Schultz in *The Bob Cummings Show*, guest appearances by Paul Lynde and Charles Nelson Reilly) or scripted dialogue and situations, industry processes of casting and production routinely esteemed a camp aesthetic that renders all gender expression queer. By charting this unexpected history, Miller offers new ways of exploring how supposedly repressive popular media incubated queer, genderqueer, and transgender representations.

The Heart of the Matter Peter Salgo, M.D., Joe Layden, 2011-10-25

By the head of the Open Heart ICU at Columbia Presbyterian Hospital, an incredibly persuasive and revolutionary approach for lowering the risks of heart disease, this plan links high cholesterol and Chlamydia as risk factors and lays out a program to combat both. We are on the cusp of an enormous breakthrough in preventing heart attacks forever. We are in the same place we were just before penicillin revolutionized the treatment of infectious disease, before fluoride eradicated tooth decay, and just before the polio vaccine brought that disease under control in this country. In *The Heart of the Matter*, Dr. Peter Salgo, the associate director of the Open Heart ICU at New York Presbyterian Hospital, offers a simple formula to treat people before they get sick, which in turn will prevent heart attacks before they occur. For the first time in history, we know what really causes heart attack. And that knowledge has led Dr. Salgo to this amazingly simple and straightforward program that will save millions of lives. Dr. Salgo recommends using statins, antibiotics, and aspirin to prevent coronary heart disease. This groundbreaking book also offers a self-test that readers can take to assess their own personal risk for heart disease. *The Heart of the Matter* is the beginning of a change in the treatment of heart disease. It introduces a preventative program that includes traditional diet and exercise guidelines, as well as a blanket recommendation that adults—even many young adults—incorporate medicines into the on-going pursuit for health and longevity, something that until now seemed impossible to many. Now, without using a lot of indecipherable medical jargon, this invaluable new guide will show you exactly how to attain that longer, healthier life that so many people wish for.
