*Comparing Nurseries* Professor Helen Penn, 1997-04-28 This book examines 12 nurseries in three countries how they are organized who works in them and which children attend them In particular it explores what staff think about the work they are doing how they view it and whether or not they enjoy it The author traces how these views and opinions are translated into action and how they affect the children She also explores what contribution the context and location of the nurseries makes to their practice The author compares her observations of daily practice in these nurseries and draws valuable conclusions about the values and practices which support good nursery provision Morning Routines Mira

Skylark, AI, 2025-03-06 *Morning Routines* explores how a structured start to the day can significantly boost productivity enhance mental well being and improve physical health The book argues that a consistent personalized morning routine incorporating elements like mindful hygiene proper nutrition and energizing movement is a proactive strategy against daily stress It delves into the science and psychology behind habit formation and the circadian rhythm illustrating how deliberate choices made in the first few hours after waking can dramatically influence energy levels focus and overall mood One intriguing insight is the connection between morning activity and physiological regulation which impacts mood and focus throughout the day The book's unique value lies in its emphasis on individualization encouraging readers to adapt routines to their specific needs and preferences rather than offering a one size fits all solution *Morning Routines* progresses from foundational principles and sleep science to specific strategies for designing personalized routines including optimizing sleep incorporating exercise and mastering mindful practices It culminates in a practical guide to implementation and maintenance addressing common obstacles and offering tailored solutions for personal development and overall wellness **The Search**

**for Method in STEAM Education** Jaime E. Martinez, 2017-07-04 This book explores various approaches to building a positive interdisciplinary STEAM science technology engineering arts and math learning environment as described by educators across the K-20 educational ladder Crucial to their success Martinez finds is the playful and performatory approach they employ in their teaching Their practices are creative improvisational and inclusive and are shared in detail through illustrations and interviews Throughout the book the author explores a Vygotskian cultural performatory approach to creating interdisciplinary STEAM learning environments drawing out the history of this approach and its success in fostering collaboration creativity leadership and communication skills as well as its effect on social emotional and cognitive growth in both formal and informal educational settings Studien zur Altägyptischen Kultur Band 31 Hartwig
