High Gothic Sculpture at Chartres Cathedral, the Tomb of the Count of Joigny, and the Master of the Warrior Saints Anne McGee Morganstern,2011 Re examines the sculpture on the transept porches of Chartres Cathedral and revises their chronology based on information from the previously unstudied tomb of the count of Joigny Documents the production of the monument within the context of French High Gothic sculpture Provided by publisher

Gothic Sculpture, 1140-1300 Paul Williamson,1995-01-01 This study examines the development of Gothic sculpture throughout Europe It discusses the most famous monuments such as the cathedrals of Chartres Amiens and Reims Westminster Abbey and the Siena Duomo and less familiar buildings in France England Italy Germany Spain and Scandinavia

Early Gothic Column-Figure Sculpture in France JanetE. Snyder,2017-07-05 Richly illustrated Early Gothic Column Figure Sculpture in France is a comprehensive investigation of church portal sculpture installed between the 1130s and the 1170s At more than twenty great churches beginning at the Royal Abbey of Saint Denis and extending around Paris from Provins in the east south to Bourges and Dijon and west to Chartres and Angers larger than life size statues of human figures were arranged along portal jambs many carved as if wearing the dress of the highest ranks of French society This study takes a close look at twelfth century human figure sculpture describing represented clothing defining the language of textiles and dress that would have been legible in the twelfth century and investigating rationale and significance The concepts conveyed through these extraordinary visual documents and the possible motivations of the patrons of portal programs with column figures are examined through contemporaneous historical textual and visual evidence in various media Appendices include analysis of sculpture production and the transportation and fabrication in limestone from Paris Janet Snyder s new study considers how patrons used sculpture to express and shape perceived reality employing images of textiles and clothing that had political economic and social significances

The "headmaster" of Chartres and the Origins of "Gothic" Sculpture C. Edson Armi,1994 Professor Armi s study represents a dramatic reconsideration of the origins of Gothic sculpture by employing new methodology and refuting previously accepted theories Despite the aesthetic and historical significance of the Royal Portal no documentation of its design and construction exists Nevertheless over the last century a

set of truths about the facade have become accepted Employing a new methodology that overcomes the lack of documents with a revised form of connoisseurship Edson Armi proposes a radically different biography of the Headmaster that has far reaching implications for the study of Gothic sculpture With a new perspective on the most important mid twelfth century portal the book concludes that the style and cultural context of le de France sculpture is less defined and more diverse than previously imagined More importantly the book argues that the forms of art as well as the design and working procedures in the Paris basin can no longer be seen as unique or separate from the practices of provincial French art in the period before 1140

The Oxford History of Western Art Martin Kemp, 2000 *The Oxford History of Western Art* is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the re definition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written

evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students *The Grove*

Encyclopedia of Medieval Art and Architecture Colum Hourihane, 2012 This volume offers unparalleled coverage of all aspects of art and architecture from medieval Western Europe from the 6th century to the early 16th century Drawing upon the expansive scholarship in the celebrated Grove Dictionary of Art and adding hundreds of new entries it offers students researchers and the general public a reliable up to date and convenient resource covering this field of major importance in the development of Western history and international art and architecture **The Sculpture of Chartres Cathedral**

Margaret Marriage, Ernest Marriage, 2024-05-30 The book *Sculptures of Chartres Cathedral* by Margaret Marriage is a comprehensive guide to the magnificent sculptures that adorn the Chartres Cathedral in France The book provides a detailed account of the history of the cathedral and its sculptures as well as an analysis of the artistic techniques and styles used to create them The book is divided into several chapters each of which focuses on a different aspect of the sculptures The first chapter provides an overview of the cathedral and its history while the second chapter explores the iconography of the sculptures and the religious themes they represent The third chapter delves into the technical aspects of the sculptures such as the materials used and the methods of construction The fourth chapter examines the influence of different artistic styles on the sculptures including Romanesque and Gothic The book also includes numerous photographs and illustrations to help readers visualize the sculptures and understand their significance Overall *Sculptures of Chartres Cathedral* is an essential resource for anyone interested in medieval art and architecture and a must read for those planning a visit to the Chartres Cathedral It deals mainly with the sculptures on the doorway although there are views of the general architecture and a few subjects from the interior Over 120 photographs Print ed **Twelfth-century Sculpture at the Cathedral of Bourges**
