Sea Power In The Twenty First Century Projecting A Naval Revolution:

Sea Power in the Twenty-First Century Charles Koburger, 1997-09-16 As the U S Navy enters the twenty first century many of the ships aircraft weapons and tactics it employed so successfully during the Cold War will no longer be cost effective or even effective Future battlefields will shift the locus of naval action from the high seas into littoral waters demanding sustained operations in relatively narrow shallow waters Naval forces in the twenty first century must not only meet the traditional requirements of command of the sea ships planes troops and bases carrying out forward presence crisis response strategic deterrence and sealift They must now put these together to obtain the four key operational capabilities of littoral warfare command control intelligence and surveillance and communication battlespace dominance power projection and force sustainment The core of the new U S strategic concept is power projection and it envisions naval forces directly leading Army and Air Force elements to influence events ashore most probably in the Third World And this navy must be cost effective

Military Review, 1999 **Naval Power in the Twenty-first Century** Peter J. Dombrowski, 2005 *What is Military History?* Stephen Morillo, 2013-04-03 This clear readable introduction to the popular field of military history is now available in a refreshed and updated second edition It shows that military history encompasses not just accounts of campaigns and battles but includes a wide range of perspectives on all aspects of past military organization and activity In concise chapters it explains the fundamental features of the field including The history of military history showing how it has developed from ancient times to the present The key ideas and concepts that shape analysis of military activity it argues that military history is as methodologically and philosophically sophisticated as any field of history The current controversies about which military historians argue and why they are important A survey of who does military history where it is taught and published and how it is practiced A look at where military history is headed in the future The new edition of *What is Military History* provides an up to date bibliography and cutting edge new case studies including counterinsurgency and as such continues to be ideal for classes in military history and in historiography generally as well as for anyone interested in learning more about the dynamics of a rich and growing area of study

Seapower States Andrew Lambert, 2018-11-27 A fascinating geopolitical chronicle A superb survey of the perennial opportunities and risks in what Herman Melville called the watery part of the world *The Wall Street Journal* In this volume one of the most eminent historians of our age investigates the extraordinary success of five small maritime states Andrew

Lambert author of *The Challenge Britain Against America in the Naval War of 1812* winner of the prestigious Anderson Medal turns his attention to Athens Carthage Venice the Dutch Republic and Britain examining how their identities as seapowers informed their actions and enabled them to achieve success disproportionate to their size Lambert demonstrates how creating maritime identities made these states more dynamic open and inclusive than their lumbering continental rivals Only when they forgot this aspect of their identity did these nations begin to decline Recognizing that the United States and China are modern naval powers rather than seapowers is essential to understanding current affairs as well as the long term trends in world history This volume is a highly original big think analysis of five states whose success and eventual failure is a subject of enduring interest by a scholar at the top of his game An intriguing series of stories of communities thinking seriously about how to stand their own ground when outpowered how to do so in ways that are consistent with their values and sometimes how to negotiate the descent from being a great power when the cards just aren't in their favor any more These are timely questions *Times Higher Education Supplement* Lambert is without a doubt the most insightful naval historian writing today *The Times*
