Search For Environmental Ethics:

A Search for Environmental Ethics Mary Anglemeyer, 1980 **International Handbook of Research on Environmental Education** Robert B. Stevenson, Robert Stevenson, 2013 The environment and contested notions of sustainability are increasingly topics of public interest political debate and legislation across the world Environmental education journals now publish research from a wide variety of methodological traditions that show linkages between the environment health development and education The growth in scholarship makes this an opportune time to review and synthesize the knowledge base of the environmental education EE field The purpose of this 51 chapter handbook is not only to illuminate the most important concepts findings and theories that have been developed by EE research but also to critically examine the historical progression of the field its current debates and controversies what is still missing from the EE research agenda and where that agenda might be headed Published for the American Educational Research Association AERA *Sustainability Ethics and Sustainability Research* Christian Becker, 2011-10-11 The book identifies the specific ethical aspects of sustainability and develops ethical tools to analyze them It also provides a methodological framework to integrate ethical and scientific analyses of sustainability issues and explores the notion of a new type of self reflective inter and transdisciplinary sustainability research With this the book aims to strengthen the overall ability of academics to contribute to the analysis and solution of sustainability issues in an inclusive and integrated way *Environmental Ethics and the Search for an Ecological Ethic [microform]* Pamela Courtenay Hall, 1986 **A Search for Environmental Ethics** Mary Anglemeyer, 1980 **A New Environmental Ethics** Holmes Rolston III, 2012-04-23 No one looking ahead at the middle of the last century could have foreseen the extent and the importance of the ensuing environmental crises Now more than a decade into the next century no one can ignore it A New Environmental Ethics the Next Millennium for Life on Earth offers clear powerful and oftentimes moving thoughts from one of the first and most respected philosophers to write on the environment Rolston an early and leading pioneer in studying the moral relationship between humans and the earth surveys the full spectrum of approaches in the field of environmental ethics This book however is not simply a judicious overview Instead it offers critical assessments of contemporary academic accounts and draws on a lifetime of research and experience to suggest an outlook for the future As a result this focused forward looking analysis will be a necessary complement to any balanced textbook or anthology in environmental ethics and will teach its readers to be responsible global citizens and residents of their landscape helping ensure that the future we have will be the one we wish for **A search for environmental ethics** Mary Anglemeyer, Catherine C. LeMaistre, Eleanor R. Seagraves, 1980 **Footprints on the Planet** Robert Cahn, 1978 *Environmental Ethics* Susan Jean Armstrong, Richard George Botzler, 1993 **A New Environmental Ethics** Holmes Rolston, 2012 No one looking ahead at the middle of the last century could have foreseen the extent and the importance of the ensuing environmental crises Now more than a decade into the next century no one can ignore it A New

Environmental Ethics the Next Millennium for Life on Earth offers clear powerful and oftentimes moving thoughts from one of the first and most respected philosophers to write on the environment Rolston an early and leading pioneer in studying the moral relationship between humans and the earth surveys the full spectrum of approaches in the field of environmental ethics This book however is not simply a judicious overview Instead it offers critical assessments of contemporary academic accounts and draws on a lifetime of research and experience to suggest an outlook for the future As a result this focused forward looking analysis will be a necessary complement to any balanced textbook or anthology in environmental ethics and will teach its readers to be responsible global citizens and residents of their landscape helping ensure that the future we have will be the one we wish for

Environmental Ethics John Christopher Brenke,1993 Environmental Ethics Deborah A. Simmons,1988 Foundations of Socio-Environmental Research William R. Burnside,Simone Pulver,Kathryn J. Fiorella,Meghan L. Avolio,Steven M. Alexander,2022-12-08 Interdisciplinary anthology of 53 foundational readings on socio environmental research with expert commentary and links to contemporary scholarship *Environmental Ethics* Bob Jickling,Heila Lotz-Sisitka,Lausanne Olvitt,Rob O'Donoghue,Ingrid Schudel,Dylan McGarry,Blair Niblett,2021-12-07 This well constructed and highly original sourcebook integrates educational materials for teaching environmental ethics with theoretical reflections The book is set to contribute immensely to its aim of taking ethics out of philosophy departments and putting it into the streets into villages and on the Earth to make ethics an everyday activity not something left to experts and specialists Context based activities are presented in almost every chapter While it acknowledges foundational theories in environmental ethics and the work that they continue to do it wholeheartedly embraces a growing body of literature that emphasises contextual process oriented and place based approaches to ethical reflection deliberation and action It walks on the ground and isn't afraid to get a little dirty or to seek joy in earthly relationships And it ultimately breaks with much Western academic tradition by framing ethics in a storied world thus making room to move beyond Euro American perspectives in environmental issues This work will be of interest to school teachers and other non formal and informal educators teacher educators college instructors university professors and other professionals who wish to bring environmental ethics to the forefront of their pedagogical practices

Why care for Nature? Dirk Willem Postma,2006-10-31 Don't you see that the whole aim of Newspeak is to narrow the range of thought 1 George Orwell This book has been written in a time of environmental neglect A time in which the expansive needs of multinational corporations western consumer interests and the politically celebrated ideals of economic growth and technological progress appear to override any consideration for preserving natural beauty as well as consideration for those unable to speak and negotiate on their own behalf third world citizens future generations animals plants and landscapes This neglect is evident in the withdrawal of national governments from the requirements of international agreements on the reduction of greenhouse gas emissions Kyoto treaty it is manifest in the organised inability and unwillingness to establish more equal trade relations

between rich and poor countries as well as in the lack of political commitment to protect extraordinary sites of natural beauty from economic exploitation Alaska the Amazon rainforests the Dutch Wadden Sea In times like these environmental education is a hazardous and primarily ambiguous enterprise since it easily comes to function as a means to foist present responsibilities onto future generations Some proponents for instance argue that environmental education should create a new generation of citizens who are greener than their parents Bell 2004 p 43 Thus new born citizens are burdened with environmental responsibilities that we failed to live up to ourselves

Environmental Ethics David Schmidtz, Elizabeth Willott, 2002 Featuring sixty two accessible selections from classic articles to examples of cutting edge original research

Environmental Ethics What Really Matters What Really Works addresses both of the principal areas of inquiry in the field the exploration of morality from an environmental perspective and the analysis of the current state of our environment Aiming to determine what issues really matter the first section of the book responds to such questions as What is value What types of things have value Is the value of a human being fundamentally different from the kind of value we find elsewhere in nature What role do consumer goods and services play in a good life and Is there room for environmental consciousness in a good life The second section turns to the question of what it would take to solve our environmental problems It strives to go beyond the hype to present informed perspectives on the true nature of those problems and investigates important questions like What is causing or exacerbating these problems and What solutions have been tried The selections present philosophical biological and social scientific approaches to the major issues

Environmental Ethics features first hand descriptions from people who have actually been involved in such projects as wildlife management in Africa ecofeminist initiatives in India and radical activism on the high seas It also provides up to date data on population issues and community based wildlife initiatives

Ideal for undergraduate courses in environmental ethics environmental issues and applied ethics this unique text will also be a helpful resource for graduate students and professors as it retains most of the footnotes from the original articles

A Search for Environmental Ethics Mary Comp Anglemeyer, Eleanor R. Comp Seagraves, Catherine Comp Lemaistre, 1980

Radical Ecology Carolyn Merchant, 1992 This is a new edition of the classic examination of major philosophical ethical scientific and economic roots of environmental problems which examines the ways that radical ecologists can transform science and society in order to sustain life on this planet It features a new Introduction from the author a thorough updating of chapters and two entirely new chapters on recent Global Movements and Globalization and the Environment
