A Thousand Blunders Frank Leonard, 1996

During the first two decades of the twentieth century the Grand Trunk Pacific Railway played an important role in the development of the north central corridor of British Columbia. Running from Winnipeg via Edmonton and the Yellowhead Pass to Prince Rupert on the northwest coast the GTP was built to challenge the primacy of the Canadian Pacific Railway. The 1 500 kilometre British Columbia line built at great cost over some of the country's most rugged terrain was completed in 1914. But traffic on this line fell far short of company expectations and this contributed to the collapse of the GTP in 1919.
