Understanding Affections in the Theology of Jonathan

Edwards Ryan J. Martin, 2018-11-15 This volume argues that the notion of affections discussed by Jonathan Edwards and Christian theologians before him means something very different from what contemporary English speakers now call emotions and that Edwards's notions of affections came almost entirely from traditional Christian theology in general and the Reformed tradition in particular. Ryan J. Martin demonstrates that Christian theologians for centuries emphasized affection for God associated affections with the will and distinguished affections from passions generally explaining affections and passions to be inclinations and aversions of the soul. This was Edwards's own view and he held it throughout his entire ministry. Martin further argues that Edwards's view came not as a result of his reading of John Locke or the pressures of the Great Awakening as many Edwardsean scholars argue but from his own biblical interpretation and theological education. By analysing patristic, medieval and post-medieval thought and the journey of Edwards's psychology, Martin shows how on their own terms pre-modern Christians historically defined and described human psychology.

The Religious Beliefs of America's Founders Gregg L. Frazer, 2014-08-15 Were America's Founders Christians or deists? Conservatives and secularists have taken each position respectively mustering evidence to insist just how tall the wall separating church and state should be. Now Gregg Frazer puts their arguments to rest in the first comprehensive analysis of the Founders' beliefs as they themselves expressed them, showing that today's political right and left are both wrong. Going beyond church attendance or public pronouncements made for political ends, Frazer scrutinizes the Founders' candid declarations regarding religion found in their private writings. Distilling decades of research, he contends that these men were neither Christian nor deist but rather adherents of a system he labels theistic rationalism, a hybrid belief system that combined elements of natural religion, Protestantism and reason with reason the decisive element. Frazer explains how this theological middle ground developed, what its core beliefs were and how they were reflected in the thought of eight Founders: John Adams, Thomas Jefferson, Benjamin Franklin, James Wilson, Gouverneur Morris, James Madison, Alexander Hamilton and George Washington. He argues convincingly that Congregationalist Adams is the clearest example of theistic rationalism that presumed deists Jefferson and Franklin are less secular than supposed and that even the famously taciturn Washington adheres to this theology. He also shows that the Founders held genuinely religious beliefs that aligned with morality, republican government, natural rights, science and progress. Frazer's careful explication helps readers better understand the case for revolutionary recruitment, the religious references in the Declaration of Independence and the religious elements and lack thereof in the Constitution. He also reveals how influential clergymen backing their theology of theistic rationalism with reinterpreted Scripture preached and published liberal democratic theory to justify rebellion. Deftly blending history, religion and political thought, Frazer succeeds in showing that the American experiment was neither a wholly secular venture nor an attempt to create a Christian

nation founded on biblical principles By showcasing the actual approach taken by these key Founders he suggests a viable solution to the twenty first century standoff over the relationship between church and state and challenges partisans on both sides to articulate their visions for America on their own merits without holding the Founders hostage to positions they never held **Makers of Christian Theology in America** Mark G.
