Denzin, 2017-07-12 Delinquency is one of those social problem areas that calls upon the contributions of many different disciplines A wide variety of social psychological economic and political forces interact in the organization and operation of agencies of delinquency prevention and control as well as in the lives of delinquents As a result research on delinquency is exceedingly complex To understand what is required to understand delinquency it is necessary to grasp all of its facets and the contributions of each of the forces contributing to delinquency as they relate to one another Measures to prevent and control delinquency constitute a system of organizations facilities and practices with a great deal of inherent conflict Some agencies even perceive themselves as being able to operate successfully without regard to the work of other agencies From the standpoint of the delinquent a total system is in operation and the delinquent s experience reflects all the conflict and lack of clarity that such a complex system encompasses To understand the delinquent s experience it is essential to explore the joint effects of the various agencies that deal with him The comparative study of the organization and operations of similar agencies in different jurisdictions greatly enhances the accuracy with which the crucial questions and variables that affect delinquency can be identified This study by Stanton Wheeler and his associates about the handling of juvenile offenders in two different police departments continues to provide a striking contribution to understanding delinquency      **The Psychology of Adoption** David M. Brodzinsky Associate Professor of Developmental and Clinical

Psychology Rutgers University, Marshall D. Schechter Professor of Child and Adolescent Psychiatry University of Pennsylvania School of Medicine (Emeritus), 1990-04-12 In this volume David Brodzinsky who has conducted one of the nation's largest studies of adopted children and Marshall Schechter a noted child psychiatrist who has been involved with adoption related issues for over forty years have brought together a group of leading researchers from various disciplines to explore the complex interdisciplinary subject of adoption While recent empirical work has shown that adopted children are more vulnerable to a host of psychological and school related problems compared to their nonadopted peers and that the rate of referral of adopted children to mental health facilities is far above what would be expected given their representation in the general population our understanding of the basis for these problems remains unclear In this book theoretical empirical clinical and social policy issues offer new insights into the problems facing parents of adopted children and especially the children themselves A comprehensive study *The Psychology of Adoption* will be of interest to child psychiatrists developmental and clinical psychologists social workers social service providers and adoptive parents
