Textiles and Clothing Sustainability Subramanian Senthilkannan Muthu, 2016-09-13 This is the first book to deal with the innovative technologies in the field of textiles and clothing sustainability It details a number of sustainable and innovative technologies and highlights their implications in the clothing sector There are currently various measures to achieve sustainability in the textiles and the clothing industry including innovations in the manufacturing stage which is the crux of this book     **Textile Technology Digest** ,2002     **Melliand International** ,2006     **Process Control in Rotor**

**Spinning** R. Senthilkumar, 2016-05-20 Open end spinning is a process in which fibrous material is highly drafted ideally to the individual fiber state creating a break in the continuum of the fiber mass The individual fibers are subsequently collected onto the open end of a yarn that is rotated to twist the fibers into the yarn structure to form a continuous yarn length Rotor spinning usually referred to as open end spinning was commercially introduced during the late 1960s and is second only to ring spinning in terms of short staple yarn production The rotor spinning machine is fed with draw frame sliver which transform the yarn directly into packages eliminating the roving process With this spinning method twisting and package building are separated by employing the false twist principle The first rotor spinning machine suitable for industrial use was presented in 1967 with the name BD200 in ITMA exhibition The current share of rotor spun yarn is around 20% of total staple fiber yarn production and it is increasing steadily     **The Economics, Science and Technology of Yarn**
