Predictive Geology With Emphasis On Nuclear Waste Disposal:

Predictive Geology Ghislain De Marsily, Daniel F Merriam, 2013-10-22 Predictive Geology With Emphasis on Nuclear Waste Disposal covers the proceedings of papers presented at sessions sponsored by the International Association for Mathematical Geology. The topics that this book tackles are issues relevant to nuclear waste disposal. The first chapter discusses the use of plate tectonics as a catastrophe theoretic model and the second chapter covers geologic predictions and radioactive waste disposal. Chapter 3 also talks about radioactive waste disposal with emphasis on the application of predictive geology. Chapter 4 discusses salt domes and Chapter 5 tackles the use of fault tree analysis for probabilistic assessment of radioactive waste segregation. The sixth chapter covers predictive geology in nuclear waste management while the seventh chapter tackles nuclear power on unstable ground. The eighth chapter deals with long term thermohydrologic behavior of nuclear waste repositories. Chapter 9 discusses the influence of faulting on groundwater flow and contaminant transport while chapter 10 covers the influence of microfissures in crystalline rock on radionuclide migration. The eleventh chapter tackles the long term prediction of the fate of nuclear waste deeply buried in granite and the twelfth chapter talks about the use of quantitative evaluation of the contribution of geologic knowledge in exploration for petroleum. The last chapter deals with resource estimation models and predicted discovery. Researchers and professionals concerned with the effects of radioactive materials to the environment will find this book a great source of information. **Predictive Geology, with Emphasis on Nuclear-waste Disposal** International Association for Mathematical Geology, 1982

Geostatistik in der Baugrundmodellierung Christian Gau, 2010-11-01 Christian Gau zeigt Einsatzmöglichkeiten und Grenzen geostatistischer Methoden in der Baugrundmodellierung auf, definiert Anforderungen an Baugrundmodelle und untersucht ihre Erfüllbarkeit durch Anwendung geostatistischer Verfahren sowie die Bewertbarkeit geostatistischer Modelle. **Active Tectonics** National Research Council, Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Geophysics Research Forum, Geophysics Study Committee, 1986-01-01 Over 250 000 people were killed in the Tangshan China earthquake of 1976 and other less active tectonic processes can disrupt river channels or have a grave impact on repositories of radioactive wastes. Since tectonic processes can be critical to many human activities the Geophysics Study Committee Panel on Active Tectonics has presented an evaluation of the current state of knowledge about tectonic events which include not only earthquakes but volcanic eruptions and similar events. This book addresses three main topics: the tectonic processes and their rates, methods of identifying and evaluating active tectonics and the effects of active tectonics on society. **INIS Atomindex**, 1985
