Translated and Edited by Ruth Saunders Magurn. [With Plates, Including Reproductions and Portraits.].** Sir Peter Paul Rubens, Ruth Saunders MAGURN, 1955      **The Letters of Sir Peter Paul Rubens** Peter Paul Rubens, 1955      **Art Market and Connoisseurship** Anna Tummers, Koenraad Jonckheere, 2008

The question of whether seventeenth century painters such as Rembrandt and Rubens were exclusively responsible for the paintings later sold under their names has caused many a heated debate. Despite the rise of scholarship on the history of the art market, much is still unknown about the ways in which paintings were produced, assessed, priced and marketed during this period, which leads to several provocative questions: did contemporary connoisseurs expect masters such as Rembrandt to paint works entirely by their own hand? Who was credited with the ability to assess paintings as genuine? The contributors to this engaging collection—Eric Jan Sluijter, Hans Van Miegroet and Neil De Marchi among them—trace these issues through the booming art market of the seventeenth and eighteenth centuries, arriving at fascinating and occasionally unexpected conclusions.

**The Letters of Paul Rubens** Peter Paul Rubens, 1955      *Catalogue of the Choice Collection of Engravings and Etchings Formed by the Late St. John Dent, Esq., which Will be Sold by Auction ...* Sotheby, Wilkinson & Hodge, 1884      **Concepts of Creativity in Seventeenth-century England** Rebecca Herissone, Alan Howard, 2013

The first genuinely interdisciplinary study of creativity in early modern England. In the seventeenth century, the concept of creativity was far removed from most of the fundamental ideas about the creative act: notions of human imagination, inspiration, originality and genius that developed in the eighteenth and nineteenth centuries. Instead, in this period, students learned their crafts by copying and imitating past masters and did not consciously seek to break away from tradition. Most new material was made on the instructions of a patron and had to conform to external expectations and basic tenets that we tend to take for granted, such as the primacy and individuality of the author, were apparently considered irrelevant in some contexts. The aim of this interdisciplinary collection of essays is to explore what it meant to create buildings and works of art, music and literature in seventeenth century England and to investigate the processes by which such creations came into existence. Through a series of specific case studies, the book highlights a wide range of ideas, beliefs and approaches to creativity that existed in seventeenth century England and places them in the context of the prevailing intellectual, social and cultural trends of the period. In so doing, it draws into focus the profound changes that were emerging in the understanding of human creativity in early modern society, transformations that would eventually lead to the development of a more recognisably modern conception of the notion of creativity. The contributors work in and across the fields of literary studies, history, musicology, history of art and history of architecture, and their work collectively explores many of the most fundamental questions about creativity posed by the early modern English creative arts.
