School Boards Changing Local Control Series On Contemporary Educational Issues:

Towards Coherence Between Classroom Assessment and Accountability National Society for the Study of Education, 2004-04-15 In analyses of the role of national educational assessment insufficient attention has been paid to the central place of the classroom Rather than encouraging a two way flow of information today s standards based frameworks tend to direct the flow of accountability from the outside into the classroom The authors of this volume emphasize that assessment as it exists in schools today consists mainly of the measurements that teachers themselves design evaluate and act upon every day Improving the usefulness of assessment in schools primarily requires assisting and harnessing this flood of assessment information both as a means of learning within the classroom and as the source of crucial information flowing out of classrooms This volume aims to encourage debate and reflection among educational researchers professionals and policymakers Five source chapters describe successful classroom assessment models developed in partnership with teachers while additional commentaries give a range of perspectives on the issues of classroom assessment standardized testing and accountability

Restructuring the Schools John Joseph Lane, Edgar G. Epps, 1992 *The Educational Leadership Challenge* Joseph Murphy, 2002 Part I of the National Society for the Study of Education s 101st yearbook explores the changing context of educational leadership in the twenty first century through the lenses of school improvement social justice and democratic community Authors discuss topics such as leadership roles for teachers principals and superintendents rethinking professional development for school leaders school improvement processes for building instructional capacity and the evolving role of leadership in education over time

Teacher Research and Educational Reform Sandra Hollingsworth, Hugh Sockett, 1994 *Resources in Education* , 1993 From the Capital to the Classroom: Standards-based Reform in the States , 2001 **Motivating Students to Learn** Tommy M. Tomlinson, 1993 *Research in Education* , 1972 *Improving Education in a World of Politics* M. Scott Norton, 2018-10-05 This book centers on the fact that public education is involved in the politics of the world just as other systems and organizations are involved in competing for the values and resources of the many communities Keeping education out of politics or politics out of education is fallacious As long as public education is financed by taxes local state or national it must compete with other agencies and programs for the available tax dollars These realities make it necessary for school leaders to be knowledgeable of how the values and resources of the school community are distributed This need calls for an understanding of how important decisions are made or not made that affect the outcomes of public education If public schools are to remain relevant and in the main stream of public issues and related decisional outcomes they must become more knowledgeable of the political world of education and how important decisions are determined regarding educational support

NOLPE Notes Education Law Association (U.S.), 1987 *Research that Makes a Difference* David Schimmel, 1996 Administrators attorneys and graduate students who are interested in law and education or in research methods will find this book useful Rarely do

researchers combine several methods for examining legal issues in education from multiple perspectives Here four authors offer four different research methods that can be used in combination Each author offers a rationale for his or her method specific legal examples relating to controversial issues and a bibliography Each also explains the advantages and limitations of his or her strategy and how it compares to other methods In the first chapter Louise Adler examines the qualitative method emphasizing why and how society creates specific laws In the second chapter Charles Russo delineates the traditional approach of asking exactly what the law is based on statutes cases and other legal sources In the third chapter Grover Baldwin surveys the quantitative strategy This can be described as using statistics to analyze data and the relationship between variables Finally Patricia First considers the policy studies perspective which uses multiple methods to analyze options and to provide comprehensive information to decision makers in their efforts to improve legal and educational policies Contains 67 references RKJ *Current Topics in Education* ,1973 *School Boards* Patricia F.
