## **School Figures The Data Behind The Debate:**

**Saving Schools** Paul E. Peterson, 2010-03-30 In this book Peterson interprets the history of American schools by placing major educational reformers in the context of their times and relates their thinking to our own era by scrutinizing the often unanticipated consequences of their commitments and ideas These extraordinary individuals provided the critical ideas and articulated the ideals that motivated many others to search for ways to save the schools from the limitations in which they were embedded Horace Mann John Dewey Martin Luther King Al Shanker William Bennett and James S Coleman The drive to centralize was pervasive despite repeatedly expressed reform desire to customize education Peterson argues that education has become an increasingly labor intensive industry that must reverse direction and become more capital intensive or it will descend in quality Fortunately technological change is making it possible radically alter the way in which education services are delivered providing a new chance to save our schools

**Sick Schools** David V. Anderson, 2020-01-10 Who's afraid of for profit education Those who work in non profit or government owned and operated schools Many parents and other stakeholders have been made fearful by this education establishment What's more important to humans nutrition or education Nutrition is more important because it is the prerequisite for other human activities including education What organizations provide food and who pays for the food Food is provided by for profit farmers for profit processors for profit wholesalers and for profit retailers Most food is purchased with the consumers own money but a significant amount is purchased by low income individuals using food stamps Why can't education be provided similarly using education stamps We trust for profit enterprises to provide our food Why can't we trust for profit enterprises to provide K 12 education Fearmongers have frightened us and made us into gullible compliant socialists who despise commercial activities in education Go to the supermarket and ponder its marvelous array of foods and then contemplate how a for profit K 12 education sector would please and amaze its customers

**Renewing Democracy in Young America** Daniel Hart, James Youniss, 2018 With a government plagued by systemic ills and deep ideological divides democracy as we know it is in jeopardy Yet ironically voter apathy remains prevalent and evidence suggests standard civic education has done little to instill a sense of civic duty in the American public While some are waiting for change to come from within trying to influence already polarized voters or counting down the days until the next election leading child and adolescent development experts Daniel Hart and James Youniss are looking to another solution America's youth In *Renewing Democracy in Young America* Hart and Youniss examine the widening generation gap the concentration of wealth in pockets of the US and the polarized political climate and they arrive at a compelling solution to some of the most hotly contested issues of our time The future of democracy depends on the American people seeing citizenship as a long term psychological identity and thus it is critical that youth have the opportunity to act as citizens during the time of their identity formation Proposing that 16 and 17 year olds be able to vote in municipal elections and suggesting that schools create science based community oriented environmental

engagement programs the authors expound that by engaging youth through direct citizen participatory experiences we can successfully create active and committed citizens Political scientists media commentators and citizens alike agree that democratic processes are broken across the nation but we cannot stop at simply showing that our political system is dysfunctional Refreshingly lucid and unabashedly hopeful *Renewing Democracy in Young America* is an impeccably timed call to action
