**The Recovery of Rhetoric** Richard H. Roberts, James M. M. Good, 1993      *Rhetoric and the Arts of Design* David S. Kaufer, Brian S. Butler, 2013-11-26 The design arts from the design of buildings and machines to software and interfaces are associated with types of knowledge and performance thought to be structured modular and systematic Such arts have become increasingly prestigious in our technocratic society Since Aristotle the art of rhetoric was conceived as a loosely structured practical art thought to be limited in the extent to which it could mimic more precise subject matters The art of rhetoric has been controversial since classical times but its status has sunk even lower since the industrial revolution a point when civic cultures began to cede authority and control to the cultures of specialized experts Many sympathizers of rhetoric have resisted its decline by calling for a civic art of public discourse to stand in opposition to a technocratic specialized discourse that has come increasingly to disenfranchise the ordinary citizen This is the first book to question the rhetoric technical knowledge split from a more fundamental perspective To get some perspective on what is at stake in rhetoric s traditional classification as a practical art the authors explore the distinction between practical and design arts enumerate the various criteria cited in the literature for qualifying a cluster of knowledge and performative skills to count as an art of design show how the knowledge and performative skills associated with the art of rhetoric meet the major requirements of design knowledge propose a general architecture of rhetorical design one descriptive both of civic address and specialized academic argument turn to the Lincoln Douglas debates to embody and provide some empirical support and illustration for their architecture demonstrate how Lincoln and Douglas can be thought of as expert designers whose rhetoric is highly structured and modular and explain how the rhetoric of both rhetorical agents can be represented in the layers and modules that one needs to display plans for buildings software or other design artifacts These layers and modules are not just post hoc annotations of the debates they also illuminate new and systematic ways for viewing the debates and by implication other specimens of rhetoric in terms of strategies of artistic production Kaufer and Butler conclude their presentation by citing some of the research and educational implications that follow from housing rhetoric within the family of design arts

**Rhetoric and Scripture** Thomas H. Olbricht, 2021-03-31 This book offers a unique overview of the development of rhetorical criticism both in North America and internationally through the work of pioneering New Testament scholar Thomas H. Olbricht. Lauri Thur n has gathered nineteen of Olbricht's essays as a guidebook to rhetorical criticism for students, clergy, and scholars. The range of essays from throughout Olbricht's career illuminate the history of rhetorical criticism and reflect the different motivations of ancient and contemporary rhetorical approaches. Essays focus on the history of biblical rhetorical analysis, the rhetorical analysis of biblical texts, the characteristics of rhetorical analysis, and types of biblical rhetorical criticism. A foreword by Thur n and a memorial essay by Carl R. Holladay contextualize Olbricht's work. Anyone interested in the rhetorical study of the New Testament will find this volume inspiring and informative.
