Generalized Bounded Query Hierarchies Meera Sitharam, 1990 Abstract The power of an oracle computation is determined by three basic factors the complexity of the computation the complexity of the oracle and oracle access restrictions Although it is natural to expect that the influence of these factors are correlated this thesis establishes that the influence of the third factor is largely independent of the first two In other words we establish that the influence of natural oracle access restrictions on the power of an oracle computation remains the same for all reasonable and natural choices of oracle and computation complexities *Stochastic Mechanics and Stochastic Processes* Aubrey Truman, 1988-07-13 The main theme of the meeting was to illustrate the use of stochastic processes in the study of topological problems in quantum physics and statistical mechanics Much discussion of current problems was generated and there was a considerable amount of interaction between mathematicians and physicists The papers presented in the proceedings are essentially of a research nature but some Lewis Hudson are introductions or surveys *Logic Colloquium '90* J.
