Supporting Mathematical Learning Joanne Picone-Zocchia, Giselle O. Martin-Kniep, 2008-10-20. This book distills an array of tools, tips, templates, and best practice strategies for teaching mathematics along with hands-on student activities in one easy-to-use resource. Geared to helping students develop conceptual understanding as well as practical skills in math, the book devotes major attention to the use of standards, performance criteria, and assessment for guiding both instruction and lesson planning and includes an extensive section on designing math problems. Focusing on such areas as patterns, measurement, computation using money and fractions, the book shows teachers how to design effective standards-based lessons from setting the learning goals and creating the math problems to crafting hands-on activities. The book also includes detailed advice on the use of questions for guiding students through thinking and reasoning processes. Hands-on lessons broken down by topic and grade level comprise over half the book. *Catalogue of Title-entries of Books and Other Articles Entered in the Office of the Librarian of Congress, at Washington, Under the Copyright Law ...
