CBI Mini Dagstuhl Seminars *Innovation Promotion Policies and Institutional Reform in China* Kai Kajitani, 2024-08-05 This book focuses on the political economy behind innovation in China's new industrial sectors particularly the effects of policies and government regulation in the absence of the rule of law. In its analysis the book aims to elucidate the mechanisms that generate innovation from multiple perspectives while utilizing insights from political science and law. The analysis in this book focuses on the following three points. First, by examining Guizhou Province's Big data industry promotion policy, import substitution, digitization policy, and government intellectual property strategy, we seek to empirically clarify the extent to which Chinese government industrial policy has stimulated innovation. Next, we examine in detail the issues surrounding the rule of law in China regarding introducing anti-monopoly laws for digital platform companies and developing the intellectual property court system. Third, it focuses on the role played by local governments in industrial policy, including the impact of industrial guidance funds on the efficiency of the regional financial sector and the impact of local bond issuance on the effectiveness of resource allocation among regions.

Reimagine Pricing Jan Y. Yang, 2025-06-11 This book highlights the transformative potential of AI-enabled pricing, showing how it empowers businesses to unlock revenue, optimize customer experiences, and gain a competitive edge. By combining cutting-edge AI technologies with actionable strategies, it offers a comprehensive roadmap for organizations looking to move from reactive manual pricing processes to proactive data-driven systems that predict, adapt, and create value in real time. Focused on practical applications, the book bridges the gap between technological innovation and real-world implementation. It features a unique blend of strategic insights, technical examples including Python code and AI workflows, and case studies from industries such as retail, travel, and manufacturing. These examples demonstrate how companies have increased margins, reduced churn, and driven customer loyalty by leveraging AI. It also explores fast-evolving trends like autonomous systems, blockchain transparency, and ecosystem-driven pricing, making it essential reading for professionals eager to future-proof their pricing strategies. A key contribution of the book is its focus on the human element of AI adoption. It addresses challenges like resistance to change, ethical considerations in pricing fairness, and building trust with both internal teams and customers. By reframing AI as an enabler rather than a replacement, the book equips pricing professionals to transition from tactical roles to strategic leadership, fostering collaboration between human intuition and machine intelligence. The book raises provocative questions: How can businesses harness AI without compromising ethics or transparency? What skills will pricing teams need to thrive in an AI-driven future? And how can organizations align AI pricing with broader strategic goals? It answers these questions by offering clear, actionable solutions and a vision for integrating AI into the heart of business operations, transforming pricing from a functional necessity into a strategic differentiator. Designed for business leaders, pricing experts, and AI enthusiasts, this book is not just a guide; it's a call to action to embrace the future of AI-enabled pricing with confidence, creativity, and purpose.

Year 2 GenAI Safety and Security Emma, 2025-03-08 We are celebrating year 2 after GenAI explosion. Still, there are many questions on the table.

for what would be next for the future of GenAI and humanity Nobody would what is next When Trump won the President 2025 that future would be more unknown than ever with a trade war and AI race However between no regulation and bad regulations obviously we are much better without regulations The reality is regulation only work out for the good guys trying to follow the rules while the bad guys will do whatever regardless regulation My story started a year ago A day I lost an entire access to everything that I have built for three years since a pandemic with questions about the first chapter of human and genAI The book is a whole story of my second year with GenAI explosion I will walk you through the most controversy period of 2024 known as the big election When Donald J Trump known for several accusation for his first term and previous past won the second term non consecutive term despite of how media predicted that he will lose the biggest ever cyber security in this history in tech healthcare telecommunication and finance the bottleneck of AI safety and security also the main updates of policies and prevention for the better future of humanity
