the same time massively more surprising We are so impressed by what they can do that we give them a lot of agency But because they are so hard to comprehend this leads to all kinds of unintended consequences In the 20th century things were simple we had the economy of corporations In the first two decades of the 21st century we saw the emergence of the economy of people otherwise known as the digital economy enabled by the internet Now we re seeing a new economy take shape the economy of algorithms

O BRAVE 'NEW NORMAL' WORLD: Living with Coronavirus Steve Gleadhil,2025-10-14 It is ironic that having spent several thousand years subjugating all other life forms so we could become the dominant species we have wilfully ceded our hard won authority over our fellow animals to inanimate technology In many cases we have become so blindly reliant on machines that we have stopped using our own wits to the point where our brains are becoming dangerously redundant We hardly need to think for ourselves at all This vacuous mentality that we seem to be embracing is pervading all aspects of our behaviour and society The rise of AI that now exceeds our own intelligence raises new ethical and existential dilemmas As we develop synthetic minds we will need to weigh up how we design them what we allow and don t allow them to do and crucially how to ensure their needs are aligned with our own Meanwhile humanity is waging a suicidal war on the natural world according to secretary general of the UN Antonio Guterres which also ultimately jeopardises our very existence
